13. ADDITIONAL NOTES

(A) Shelf life: Twelve (12) months when devices are to be stored in factory supplied, unopened ESD moisture sensitive bag under maximum environmental conditions of 30°C, 70% R.H.
(B) MSL (moisture sensitivity level) Class 2a.
(C) Do not pull a vacuum over port hole of the microphone. Pulling a vacum over the port hole can damage the device.
(D) Do not board wash after the reflow process. Board washing and cleaning agents can damage the device. Do not expose to ultrasonic processing or cleaning.
(E) Do not brush board after the reflow process. Brushing the board with/without solvents can damage the device.
(F) Do not insert any object in port hole of device at any time as this can damage the device.
(G) Number of reflow - Recommend no more than 3 cycles.
(H) Do not apply air pressure into the port hole. Air pressure over 30psi can damage the device.

14. RELIABILITY SPECIFICATIONS

Note: After test conditions are performed, the sensitivity of the microphone shall not deviate more than 3dB from its initial value.
