MULTIPOWER BCD TECHNOLOGY

PowerSO36

ORDERING NUMBER: STA500

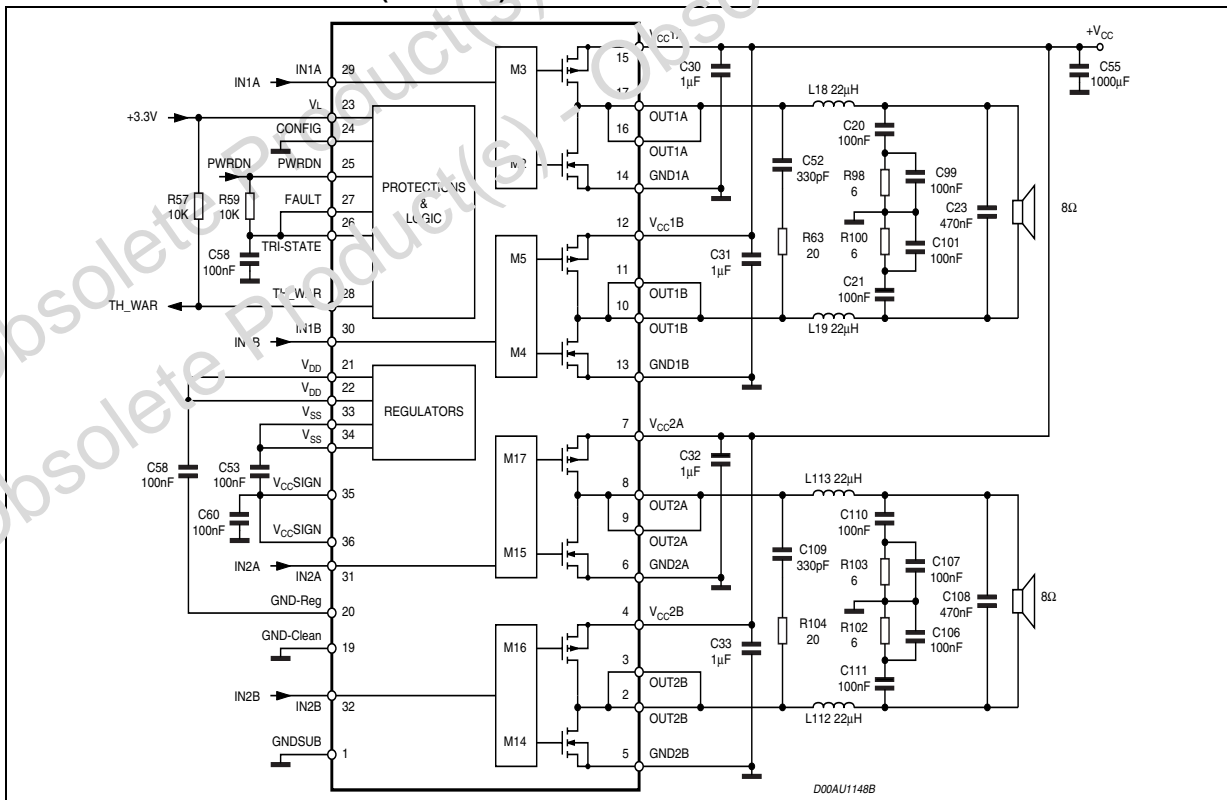

DESCRIPTION

STA500 is a monolithic quad half bridge stage in Multipower BCD Technology. The device can be used as dual bridge or reconfigured, by connecting CONFIG pin to V_{DD} pin, as single bridge with double current capability, and as half bridge (Binary mode) with half

current capability.

The device is particularly designed to make the output stage of a stereo All-Digital High Efficiency (DDX™) amplifier capable to deliver 30W + 30W output power on 8Ω load and 60W on 8Ω load in bridge BTL configuration or more 60W on 4Ω load. The input pins have threshold proportional to I_{bias} pin voltage.
