

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Evaluation board for the LDBL20 high PSRR, miniaturized 200 mA LDO

Data brief

Features

- Output current: 200 mA
- Logic controlled electronic shutdown
- High PSRR
 - 80 dB @ 1 kHz
 - 50 dB @ 100 kHz
- Quiescent current:
 - 20 μ A typ. at no load
 - 0.03 μ A typ. in off mode
- 2.5 V +/- 2% output voltage
- Other voltage options available on request
- ST Stamp™ 0.47 x 0.47 mm² bumpless CSP
- RoHS compliant

Description

The STEVAL-ISB034V1 board features the LDBL20 high performance linear voltage regulator, configured to convert a 2.85 V to 5.5 V DC input voltage into a precise and stable 2.5 V output voltage.

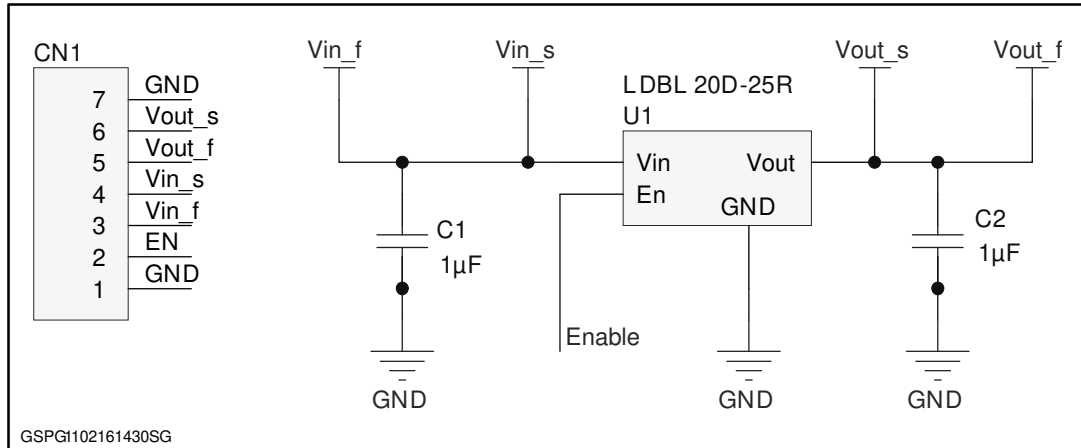

Only two small ceramic capacitors are needed to implement the linear regulator solution.

The very low dropout LDBL20 voltage regulator features high PSRR, low quiescent current and the minute ST Stamp™ chip-scale package, with a footprint of only 0.47 x 0.47 mm².

It is designed for low power battery-operated equipment like smartphones, tablets and wearable devices.
