

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

- Digital UV index sensor
 - 0-15 UV index output range
 - Resolution UVI/16
 - Selectable readout: 1 Hz ODR / one shot
- ECOPACK®, RoHS, and "Green" compliant

Applications

- Tablets and mobile phones
- Gaming and virtual reality input devices
- Wellness and wearable devices
- Drones and robotics
- IoT devices such as industrial and factory automation machines

Features

- Analog supply voltage: 1.91 V to 3.6 V
- Digital supply voltage I/Os: 1.8 V
- Power-down, "always on" eco power mode
- Motion MEMS sensors:
 - 3D accelerometer sensor
±2/±4/±8/±16g selectable full-scale acceleration range
 - 3D gyroscope sensor
±125/±245/±500/±1000/±2000dps selectable full-scale angular rate range
 - 3D magnetometer ±4/±8/±12/±16gauss selectable full-scale magnetic field range
- Environmental sensors:
 - High accuracy pressure sensor
 - Piezo-resistive pressure sensor
 - 260-1260 mbar absolute pressure range
 - Low power consumption
 - Low noise (0.0075 hPa RMS)
- Humidity and temperature sensor
 - 0 to 100% RH range
 - -40 to +85 °C temperature range
 - 16 bit ADC measurement

Description

ST MEMS sensor module integrates the ST 3D accelerometer, 3D magnetometer, 3D gyroscope, pressure, relative humidity, ambient temperature and UV index sensors.

1 Introduction

STEVAL-MKI128V5 sensor module integrates a set of complementary motion and environmental sensors. It is a robust and easy-to-assemble building block for quick system prototyping.

The module features the following ST sensors:

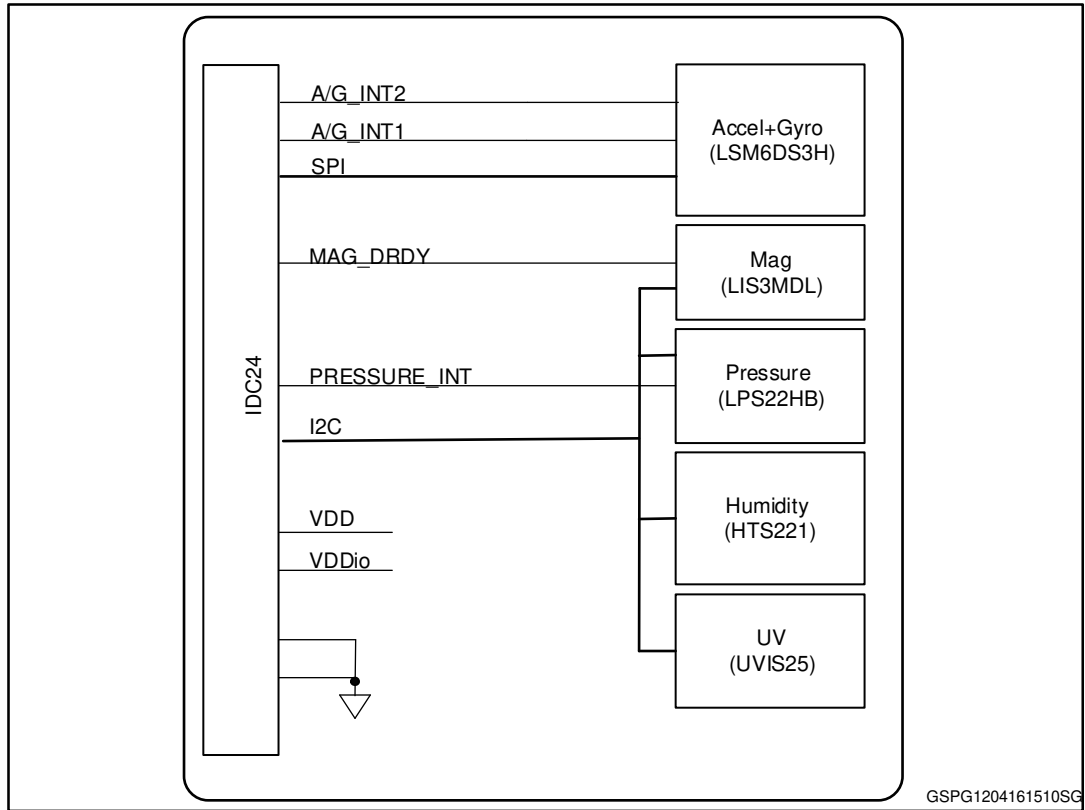

- LSM6DS3H (3D Accelerometer + 3D Gyroscope)
- LIS3MDL (3D magnetometer)
- LPS22HB (pressure)
- HTS221 (humidity + temperature)
- UVIS25 (UV index)

Each sensor has dedicated drivers available for the principal operating systems. The sensor module and accompanying software form a convenient sensor subsystem solution for developing gaming, augmented reality, indoor navigation and localization-based services.

Find the relevant sensor documentation on www.st.com.
