# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## STODD03

# Monolithic 2-channel power management for high-definition ODD with integrated power switch

### Features

- 1.2 MHz DC-DC current mode PWM converter
- Input voltage from 4 V up to 6 V
- Step-down 3.3 V fixed output voltage, up to 700 mA load
- Step-up output current up to 500 mA
- 2% step-down output voltage tolerance
- 3% step-up output voltage tolerance
- Synchronous rectification
- Step-down power-save mode at light load
- Typical efficiency: 90%
- Internal soft-start
- Enable functions
- True cutoff function for step-up converter
- Integrated motor control power switch
- Uses tiny capacitors and inductors
- Available in QFN16 (4 x 4 mm)

## Description

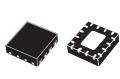

The STODD03 is a 2-channel power management device intended for Blu-Ray applications based on high density optical storage devices. It integrates one step-down converter able to provide 3.3 V fixed output voltage up to 700 mA load, and one step-up converter to provide the power supply needed for the blue laser in applications where only 5 V input voltage is available. The step-up output voltage is adjustable in the range from 6.5 V to 14 V, with current capability up to 500 mA. Both step-down and step-up channels integrate low R<sub>DS\_ON</sub> Nchannel and P-channel MOSFETs, allowing high DC-DC efficiencies. The enable function with true

August 2011

QFN16L (4 x 4 mm) shutdown makes the step-up section particularly suitable for optical storage power management applications. Moreover, the STODD03 has a 1 A integrated power switch for motor control power supply. The high switching frequency allows the use of tiny SMD components. Low output ripple voltage is achieved thanks to the current mode PWM topology. The device includes soft-start control, thermal shutdown, and peak current limit to prevent damage due to accidental overload. The STODD03 is packaged in a QFN16 (4 x 4 mm).

#### **Typical application** 4

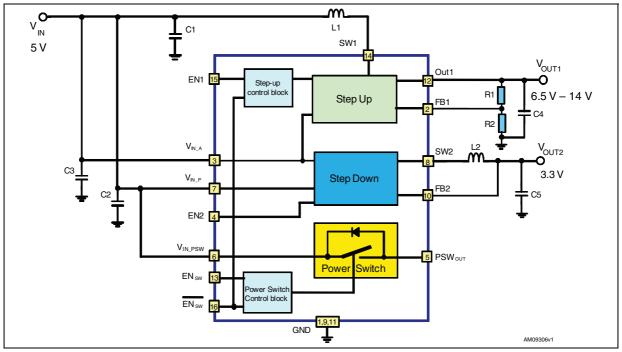

Figure 3. **Application circuit** 

| Table 7. | List of external components <sup>(1)</sup> |
|----------|--------------------------------------------|
|----------|--------------------------------------------|

| Component  | Value         | Recommended part number                  |  |
|------------|---------------|------------------------------------------|--|
| C1, C2, C3 | 10 µF         | Murata, GRM21BR61A106KE19L               |  |
| C4, C5     | 22 µF         | Murata, GRM32ER61C226KE20L               |  |
| L1         | 4.7 μH        | Coilcraft, LPS6225-472MLB                |  |
| L2         | 3.3 µH        | Coilcraft, LPS4018-332MLB                |  |
| R1, R2     | 33 kΩ, 3.3 kΩ | V <sub>OUT1</sub> = 8.8 V <sup>(2)</sup> |  |

The components listed above refer to a typical applications circuit. Operation of the STODD03 is not limited to the choice of these external components. If a different solution is used, it is recommended to validate the suitability of the external components by thoroughly testing the application on a PCB evaluation board. 1.

2. R1 and R2 are calculated according to the following formula: R1 = R2 x [( $V_{OUT1} / V_{FB1}$ )- 1]. Resistors in the range of 1 k to 50 k are recommended.

## 5 Electrical characteristics

Refer to the typical application circuit,  $V_{IN\_P} = V_{IN\_A} = V_{IN\_PSW} = V_{EN1,2} = 5 \text{ V}$ ,  $V_{OUT1} = 9 \text{ V}$ ,  $V_{OUT2} = 3.3 \text{ V}$ ,  $C_{1,2,3} = 10 \mu\text{F}$ ,  $C_{4,5} = 22 \mu\text{F}$ ,  $L1 = 4.7 \mu\text{H}$ ,  $L2 = 3.3 \mu\text{H}$ ,  $T_J = -25 \text{ to } 125 \text{ °C}$  (unless otherwise specified, typical values are given at  $T_J = 25 \text{ °C}$ ).

#### Table 8. Electrical characteristics (continued)

#### Table 8. Electrical characteristics (continued)

| Symbol            | Parameter                             | Test conditions | Min. | Тур. | Max. | Unit |
|-------------------|---------------------------------------|-----------------|------|------|------|------|
| Thermal section   |                                       |                 |      |      |      |      |
| T <sub>SHDN</sub> | Thermal shutdown <sup>(2)</sup> 130   |                 | 150  |      | °C   |      |
| T <sub>HYS</sub>  | Thermal shutdown hyst. <sup>(2)</sup> |                 |      | 15   |      | °C   |

1. If  $V_{OUT1}$  > OVP, the device stops switching.

2. Guaranteed by design, but not tested in production.

3.  $V_{OUT} = 90\%$  of nominal value

## 6 Package mechanical data

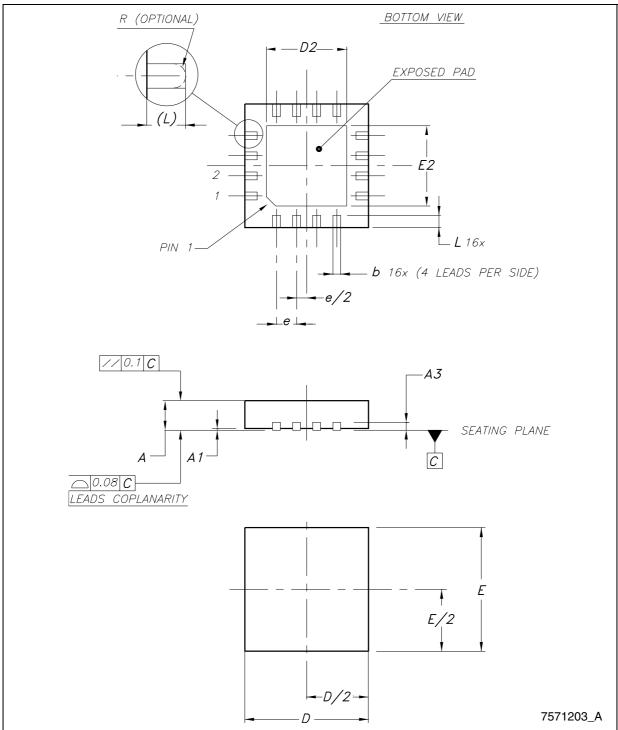

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions, and product status, are available at www.st.com. ECOPACK is an ST trademark.

| Date        | Revision | Changes        |
|-------------|----------|----------------|
| 30-Aug-2011 | 1        | First release. |

#### Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

UNLESS EXPRESSLY APPROVED IN WRITING BY TWO AUTHORIZED ST REPRESENTATIVES, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.

ST and the ST logo are trademarks or registered trademarks of ST in various countries.

Information in this document supersedes and replaces all information previously supplied.

The ST logo is a registered trademark of STMicroelectronics. All other names are the property of their respective owners.
