

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Automotive power Schottky rectifier

Datasheet – production data

Description

Dual center tap Schottky rectifier designed for high frequency miniature switched mode power supplies such as adaptators and on board DC/DC converters for automotive applications.

Table 1. Device summary

Symbol	Value
$I_{F(AV)}$	2 x 10 A
V_{RRM}	100 V
$T_{j(max)}$	175 °C
$V_F (Typ)$	0.59 V

Features

- Negligible switching losses
- High junction temperature capability
- Good trade off between leakage current and forward voltage drop
- Low leakage current
- Avalanche rated
- AEC-Q101 qualified.
- PPAP capable

1 Characteristics

Table 2. Absolute ratings (limiting values per diode at 25 °C, unless otherwise specified)

Symbol	Parameter		Value	Unit
V _{RRM}	Repetitive peak reverse voltage		100	V
I _{F(RMS)}	Forward rms current		30	A
I _{F(AV)}	Average forward current, δ = 0.5, T _C = 160 °C	per diode	10	A
		per device	20	
I _{FSM}	Surge non repetitive forward current	t _p = 10 ms sinusoidal	250	A
I _{RSM}	Non repetitive peak reverse current	t _p = 100 μs square	3	A
P _{ARM} ⁽¹⁾	Repetitive peak avalanche power	t _p = 10 μs, T _j = 125 °C	780	W
T _{stg}	Storage temperature range		-65 to +175	°C
T _j	Operating junction temperature ⁽²⁾		-40 to +175	°C

1. For pulse time duration deratings, please refer to [Figure 3](#). More details regarding the avalanche energy measurements and diode validation in the avalanche are provided in the STMicroelectronics Application notes AN1768, “Admissible avalanche power of Schottky diodes” and AN2025, “Converter improvement using Schottky rectifier avalanche specification”.

2. $\frac{dP_{tot}}{dT_j} < \frac{1}{R_{th(j-a)}}$ condition to avoid thermal runaway for a diode on its own heatsink

Table 3. Thermal parameters

Symbol	Parameter		Value	Unit
R _{th(j-c)}	Junction to case	per diode	1.6	°C/W
		per device	0.9	
R _{th(c)}	coupling		0.15	

When the diodes 1 and 2 are used simultaneously:

$$\Delta T_j(\text{diode 1}) = P(\text{diode 1}) \times R_{th(j-c)}(\text{Per diode}) + P(\text{diode 2}) \times R_{th(c)}$$

Table 4. Static electrical characteristics (per diode)

Symbol	Parameter	Test conditions		Min.	Typ	Max.	Unit
I _R ⁽¹⁾	Reverse leakage current	T _j = 25 °C	V _R = V _{RRM}	-	-	4.5	μA
		T _j = 125 °C		-	2	6	mA
V _F ⁽²⁾	Forward voltage drop	T _j = 25 °C	I _F = 10 A	-	-	0.77	V
		T _j = 125 °C		-	0.59	0.64	
		T _j = 25 °C	I _F = 20 A	-	-	0.88	
		T _j = 125 °C		-	0.67	0.73	

1. Pulse test: t_p = 5 ms, δ < 2%

2. Pulse test: t_p = 380 μs, δ < 2%

To evaluate the conduction losses use the following equation:
 $P = 0.55 \times I_{F(AV)} + 0.009 \times I_{F(RMS)}^2$

2 Package information

- Epoxy meets UL94, V0
- Lead-free package
- Cooling method: by conduction (C)

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.
