DESCRIPTION

The STV0976 is a low power digital image processor supporting the VS6650 1.0 Megapixel SMIA camera module at up to 15 fps, or the VS6590 SVGA camera module at up to 30 fps.

The STV0976 performs all the necessary operations required to capture state-of-the-art megapixel images, including JPEG compression and viewfinder generation, in a small footprint and low power budget. With both video input and output being SMIA-class 0, hardware acceleration in SMIA architecture achieves leading edge-mobile-imaging capabilities.

APPLICATIONS

- Mobile phone
- PDA
- Wireless security camera
