

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

The battery powered light switch

Features:

- Quick and Simple to Install
- Replaces awkward cable runs
- Simple installation option for extra light switches
- Simple screw to the wall
- Up to 150m range outdoors
- Up to 80m range in buildings
- High Quality UK manufacture
- Outdoor Weatherproof IP65
- Receiver enclosure
- Supplied ready to operate
- Switches any load up to 1.2kW

Description

The RF Solutions' SWITCHLINK System offers a quick, simple and cost effective solution to light switching, when cabling is tricky, expensive or time consuming.

Ordering Information

Part Number	Description
SWITCHLINK-S1	SWITCHLINK system—Supplied Complete with Tx and Rx

Installation Guide

Connections

SWITCHLINK can be installed in minutes, simply wire the receiver and attach the transmitter to the wall in your chosen location.

Wall Switch Transmitter:

The Wall switch transmitter is simply attached to the wall in the location required.

Wall Mounting templates are given on Page 3

AS SHOWN IN FIG 1.1

Transmitter - SWITCHLINK-TX1 FIG 1.1

FIG 1.2

Receiver - SWITCHLINK-

Receiver:

1. Connect the Supply: LIVE, NEUTRAL and EARTH.
Connect the Live to the screw terminal marked: LIVE connect the NEUTRAL and EARTH respectively.
2. Connect the LOAD to the receiver and wire in as required.
3. In most applications the LOAD would be wired as shown in FIG 1.2

Important Notes:

- All mains powered units must be earthed
- Hardwired units must be connected via an isolating switch
- See Safety information on page 5 before installing

SWITCHLINK System Operation

SWITCHLINK

Dimensions and Wall mounting information:

SWITCHLINK is a professional use product and should only be installed by a competent person.

FIG 1.3 Wall Mounting Templates
Scale 1:1
All dimensions in mm

Pairing a Receiver

NOTE: SWITCHLINK Systems are supplied pre-paired. This process is described for advanced use only.

To pair the MAINSLINK-RX it must have a 230Vac supply connected.

1. Briefly place a magnet on the receiver by the MAINSLINK-RX as shown in FIG1.3.

This will put the system in learn mode.

FIG 1.3

2. When the receiver is in learn mode you will need to pair the transmitter within 10 seconds. To do this you must switch on the transmitter for 2 seconds and then turn it off.

3. Allow 15 seconds for the receiver to return to normal operation.

Erasing a Receiver

To erase all transmitters from the MAINSLINK-RX hold a magnet beside the learn switch for 10 seconds as shown in FIG 1.4.

NOTE: You cannot erase individual MAINSLINK-TX units.

FIG 1.4

Technical Information

SWITCHLINK Transmitter

Battery: CR2032 (Li-Ion)

Capacity: 220mAh

Battery Life Expectancy: 5+years @ 50presses/day

Storage Temperature: -10 to +70°Celsius.

Operating Temperature: 0 to +50°Celsius.

	Min	Typical	Max	Units
Supply Voltage:		3V		Vdc
Quiescent Current:		4		uA
Operating Frequency	-0.045	869.50	+0.045	MHz
RF Output Power (ERP)		3		mW
Packet Length		~25		mS

Changing batteries:

Open the SWITCHLINK-TX1 by unscrewing the two screws on the front of the case.

Gently slide the battery out of the mounting bracket using your fingers - do not use pliers as you may damage the PCB.

MAINSLINK-RX Receiver

Power Supply: 110 -240Vac @ 50-60Hz

Storage Temperature: -10 to +70°Celsius.

Operating Temperature: 0 to +50°Celsius.

	Min	Typical	Max	Units
Supply Voltage	100	230	250	Vac
Quiescent Current:		0.1		mA
Operating Frequency	-0.1	869.50	+0.1	MHz
Maximum switching load (RX)		1200		W
Time delay from Tx on switch to Rx Relay operation:		50	2000	mS
Time delay from Tx sw relax to Rx Relay release:		50	2000	mS

Product Range:

Other product in this range:

MAINSLINK

Mainslink is a 230V mains switching cable replacement system - very simple to install and very reliable the MAINSLINK simply replaced switch live cables when runs are awkward or expensive. Wire Switched Live and Neutral to the TX and Live, Neutral to the receiver and the MAINSLINK outputs a switch live at the receiver when the Switched live on the transmitter is on.

Important Safety Information:

NOTE:

- Must be installed in compliance with IEEE wiring regulations and (where required) with Part P (Electrical Safety) of building regulations.
- SWITCHLINK is a professional use product and should only be installed by correctly qualified competent person.
- Always Isolate mains powered products before opening the case.

RF Solutions Ltd. Recycling Notice

Meets the following EC Directives:

DO NOT

Discard with normal waste, please recycle.

ROHS Directive 2002/95/EC

Specifies certain limits for hazardous substances.

WEEE Directive 2002/96/EC

Waste electrical & electronic equipment. This product must be disposed of through a licensed WEEE collection point. RF Solutions Ltd., fulfills its WEEE obligations by membership of an approved compliance scheme.

Waste Batteries and Accumulators Directive 2006/66/EC

Where batteries are fitted, before recycling the product, the batteries must be removed and disposed of at a licensed collection point.

Environment Agency producer registration number:
WEE/JB0104WV.
