

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

FEATURES

- DC bias current adjustable to 25mA
- Buffered Loss-of-Signal output when used with SY88903
- Monitor Diode power control circuit
- Designed for use with SY88902 and SY88903
- Single power supply
- Available in 10-pin (3mm) MSOP

DESCRIPTION

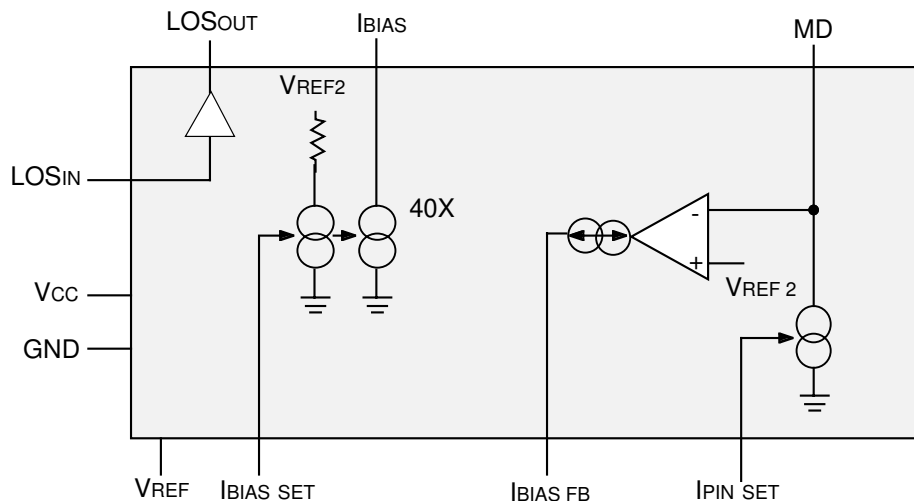

The SY88905 is an integrated Laser Diode controller for the SY88902 Laser Driver and SY88903 Laser Receiver that provides power control functions for a complete module solution. The SY88905 is designed to provide the laser diode with an independent DC threshold current (IBIAS) source to assure optimum laser diode performance. The SY88905 also provides buffered Loss-of-Signal (LOS) output in PECL level. The device is designed for fast and accurate calibration of the laser diode.

Once the optimal operating point is determined and set for a specific laser diode, the threshold current (IBIAS) is designed to automatically compensate for laser diode aging and module temperature.

APPLICATIONS

- Controller for High Speed Optical Data Transmission
- 1.25Gbps Gigabit Ethernet
- 531 Mbps and 1062Mbps Fibre Channel
- 622Mbps SONET
- Gigabit Interface Converter

PACKAGE/ORDERING INFORMATION

10-Pin MSOP (K10-1)

Ordering Information

Part Number	Package Type	Operating Range	Package Marking	Lead Finish
SY88905KC	K10-1	Commercial	905	Sn-Pb
SY88905KCTR ⁽¹⁾	K10-1	Commercial	905	Sn-Pb
SY88905KH	K10-1	Commercial	905 with Pb-Free bar-line indicator	Pb-Free NiPdAu
SY88905KHTR ⁽¹⁾	K10-1	Commercial	905 with Pb-Free bar-line indicator	Pb-Free NiPdAu

Note:

- 1. Tape and Reel.

PIN NAMES

Pin	Type	Description
VCC	Power	Positive Power supply
GND	Power	Ground
LOSIN	TTL Input	Loss-of-Signal Input from SY88903
VREF	Analog Output	Reference Voltage
IPIN SET	Analog Input	Adjustable, Resistor to VREF sets Monitor Diode Photo Current Reference
LOSOUT	PECL Output	Loss-of-Signal PECL output
IBIASFB	Analog Output	Monitor Diode Feedback
IBIASSET	Analog Input	Adjustable, Resistor to VREF sets the DC bias current for the Laser Diode
MD	Analog Input	Monitor Diode Connection
IBIAS	Analog Input	DC bias current for the Laser Diode

ABSOLUTE MAXIMUM RATINGS⁽¹⁾

Symbol	Rating	Value	Unit
V _{CC}	Power Supply Voltage	0 to +7.0	V
LOSIN	Input Voltage	0 to V _{CC}	V
LOSOUT, IPIN SET IBIASFB, IBIAS SET	Others; I/O Voltage	-0.3, V _{CC} +0.3	V
T _A	Operating Temperature Range	0 to +85	°C
T _{store}	Storage Temperature Range	-55 to +125	°C
IPIN SET, IBIAS SET, IMD	Max. Sink Current	1	mA
IBIASFB	Max. Source Current	1	mA
IBIAS	Max. Sink Current	30	mA
IVREF	Max. Source Current	2	mA

Note:

1. Permanent device damage may occur if absolute maximum ratings are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

100H ECL DC ELECTRICAL⁽¹⁾V_{CC} = +5V ±10%

Symbol	Parameter	T _A = 0°C		T _A = +25°C		T _A = +85°C		Unit	Condition
		Min.	Max.	Min.	Max.	Min.	Max.		
V _{OH}	Output HIGH Voltage	V _{CC} - 1025	V _{CC} - 880	V _{CC} - 1025	V _{CC} - 880	V _{CC} - 1025	V _{CC} - 880	mV	50Ω to V _{CC} -2V
V _{OL}	Output LOW Voltage	V _{CC} - 1810	V _{CC} - 1620	V _{CC} - 1810	V _{CC} - 1620	V _{CC} - 1810	V _{CC} - 1620	mV	50Ω to V _{CC} -2V

Note:

1. 100H circuits are designed to meet the DC specifications shown in the table where transverse airflow greater than 500lfpm is maintained.

DC ELECTRICAL CHARACTERISTICS

VCC = +5V ±10%

Symbol	Parameter	TA = 0°C			TA = +25°C			TA = +85°C			Unit	Conditions

Note:

1. Individual product specifications over-ride general specifications.

DETAILED DESCRIPTION

The SY88905 is an integrated control circuit for laser diode modules intended for high-frequency fiber-optic applications. The device is designed to operate with the SY88902 laser diode driver providing Automatic Power Control (APC) which provides bias current control and monitor diode interface. The device also interfaces with the SY88903 high-speed limiting amplifier providing chatter-free Loss of Signal function.

Laser Diode Supply Current

The SY88905 provides the adjustable drive current for the laser diode, DC bias.

Monitor Diode

The MD pin on the SY88905 provides low frequency light intensity, laser power out feedback from the monitor diode in the laser diode package. This feedback is used to adjust the IBIAS level through the Automatic Power Control circuit to maintain a near constant power output from the laser diode.
