# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## T1235T-8I

## 12 A Snubberless™ Triac

Datasheet -production data

## Features

- High static dV/dt
- High dynamic turn-off commutation
  (dl/dt)c
- 150 °C maximum T<sub>j</sub>
- Three quadrants
- Built-in ceramic for tab insulation
- Compliance to UL1557 standard
- (ref : E81734)
- ECOPACK<sup>®</sup>2 compliant component
- Complies with UL94,V0
- Surge capability V<sub>DSM</sub>, V<sub>RSM</sub> = 900 V

#### Benefits

- High immunity to false turn-on thanks to high static dV/dt
- Better turn-off in high temperature environments thanks to (dl/dt)c
- Increase of thermal margin due to extended working T<sub>j</sub> up to 150 °C
- Better thermal resistance due to the ceramic inside the package

## Applications

- General purpose AC line load switching
- Motor control circuits
- Home appliances
- Heating
- Lighting
- Inrush current limiting circuits
- Overvoltage crowbar protection

#### December 2017

1/9

This is information on a product in full production.

## Description

Available in through-hole package, the T1235T-8I Triac can be used for the on/off or phase angle control function in general purpose AC switching where high commutation capability is required. This device can be used without a snubber RC circuit when the limits defined are respected.

TO-220AB insulated provides tab insulation, UL1557 certified, rated at 2.5 kV RMS and UL-94, V0 resin compliance.

Package environmentally friendly Ecopack<sup>®</sup>2 graded (RoHS and Halogen Free compliance).

Snubberless<sup>™</sup> is a trademark of STMicroelectronics.

## 2 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK<sup>®</sup> packages, depending on their level of environmental compliance. ECOPACK<sup>®</sup> specifications, grade definitions and product status are available at: *www.st.com*. ECOPACK<sup>®</sup> is an ST trademark.

- ECOPACK<sup>®</sup>2 (Lead-free plating and Halogen free package compliance)
- Lead-free package leads finishing
- Halogen-free molding compound resin meets UL94 standard level V0.
- Recommended torque (for package screwing assembly): 0.4 to 0.6 N⋅m
