

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# T3000 Series

## Telaire Range of CO<sub>2</sub> Sensors for Harsh Environments

The T3000 series is a range of sensors designed to meet the specific needs of customers who require measuring Carbon Dioxide in harsh or difficult environments. Based on a series of modules the casing offers a number of combinations to meet the needs of range, supply voltage, and output type in a range of applications. Example applications include incubators, buses, refrigerators, subway stations, and railway carriages.

### Features

- Accurate carbon dioxide transmitter for HVAC control applications
- Easy mount with 2 external tabs.
- Rated up to IP67 (build dependent)
- Available with potting
- Different calibrations available up to 20% CO<sub>2</sub> concentration
- Analogue or digital output options
- Non-Dispersive Infra-Red measuring technology
- Sensors are shipped factory calibrated
- Accuracy for 10 year life
- Extended operating temperature range

**Amphenol**  
**Advanced Sensors**

# T3000 Series Specifications

## Sensing Method

Non-Dispersive Infra-Red (NDIR), single or dual wavelength.

## Power Supply Requirements

15 – 15Vdc  $\pm 10\%$   
24 - 18-30 VAC RMS, 50/60 Hz, or 18 to 42 VDC, polarity protected

## Power Consumption

Typical 0.7 W at nominal voltage of 24V AC RMS

## Range

See Ordering Information for calibrated ranges

## Resolution

Minimum 10bit or analog equivalent

## Accuracy

### Single Wavelength

(0~2,000 ppm as example)

- 400-1250 ppm  $\pm 30$  ppm or 3% of reading, whichever is greater\*,\*\*
- 1250-2000 ppm  $\pm 5\%$  of reading + 30ppm \*, \*\*

### Dual Wavelength

0~2,000ppm range

- 75 ppm or 10% of reading (whichever is greater)

0~200,000

$\pm 5\%$  of reading or  $\pm 0,3$  vol% CO<sub>2</sub> (whichever is larger) at 0 - 20 vol% CO<sub>2</sub> and 0°C to +25°C, At 25°C to 50°C additional  $\pm 0,1\%$  of reading or  $\pm 0,01$  vol% CO<sub>2</sub> (whichever is larger) per degree C.

\*Tolerance based on span gas of  $\pm 2\%$

\*\* ABC Logic not deactivated

## Temperature Dependence

0.2% FS / °C

## Response time, tau (63%)

< 200 sec

## Aging (Dual Wavelength only)

+/- 5% of reading annual drift.

Less than +/- 25% of reading within product life time.

## Recommended Recalibration Interval

Single Wavelength – no calibration required

Dual Wavelength - 1 year

## Working Temperature

0° to +50°C (measures within tolerance)

## Operation Temperature (Sensor Is Powered)

-30° to +50°C

## Storage Temperature

-40° to +70°C

## Minimum Lifetime

10 years or 30000 operating hours

## Flammability Classification

To UL94 5VA (dependent upon build)

## RH Range

0% to 99% RH (non-condensing)

## Atmospheric Conditions

Sensors have been designed and tested to the following, however, not all models are as capable; please discuss your application with Telaire.

- Marine, salt mist and particles present
- O<sub>2</sub> level 0-21 vol%
- 0 to 100% RH.
- Ammonium max 200mg/m<sup>3</sup>
- SO<sub>2</sub> max 0,5 vol%
- Ethylene max 500ppm vol
- Ozone

## IP Class

Up to IP67, dust tight and immersion to 1m.

Optional potting

Discuss your requirement with Telaire.

## Output Configurations

### Digital

- Modbus over RS485
- UART

### Analogue\*

- 0 to 5 V
- 0 to 10 V
- 4 to 20mA

\*Digital to Analogue Error  $\pm 1\%$

## Carbon Dioxide ABC Logic™ Self Calibration

The single wavelength sensors employ the patented ABC (Automatic Background Calibration) Logic self-calibration system. ABC Logic virtually eliminates the need for manual calibration in applications where the indoor CO<sub>2</sub> level drops to outside levels during unoccupied periods (e.g. during evening hours). ABC Logic is a special software routine in the sensor that remembers the background readings for 14 consecutive evenings, calculates if there is a sensor drift, and then corrects for it.

With ABC Logic enabled, the sensor will typically reach its operational accuracy after 25 hours of continuous operation at a condition that is exposed to ambient reference levels. Sensors will maintain accuracy specifications with ABC Logic enabled, given that it is at least three times in 14 days exposed to the reference value and this reference value is the lowest concentration to which the sensor is exposed.

*Note: Applies when used in typical indoor ambient air. Consult Telaire if other gases or corrosive agents are part of the application environment.*

## CO<sub>2</sub> Calibration Guarantee

Telaire is serious about minimizing maintenance, so each single-wavelength sensor comes with a lifetime calibration guarantee. And each dual wavelength sensor has a two-year calibration guarantee.

## Ordering Information

Please discuss your specific needs with the Telaire account management team, as many configurations are possible. Some combinations are already in production.

Derivatives include lesser ingress protection, higher fire and smoke ratings, different outputs, and different calibration levels.

### Output Options:

Digital	Analogue
Modbus	0-5V
UART	0-10V
	4-20mA

### Measuring Technology Options:

Single Wavelength with ABT Logic for HVAC Applications

Dual Wavelength for 24/7 Applications

### Materials:

Materials to Railway Specifications, or room environment specification, with or without potting.

### Available Calibrations:

0-2K	0-5K	0-50K	0-200K
0-3K	0-10K	0-100K	ppm by volume

### Power Supply Options:

15 Vdc supply  
24V nominal supply
