

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

32 W bridge car radio amplifier

Features

- High power capability:
 - 40 W/3.2 Ω EIAJ
 - 32 W/3.2 Ω @ $V_S = 14.4$ V, $f = 1$ kHz,
 $d = 10\%$
 - 26 W/4 Ω @ $V_S = 14.4$ V, $f = 1$ kHz,
 $d = 10\%$
- Differential inputs (either single ended or differential input signal are accepted)
- Minimum external component count:
 - No bootstrap capacitors
 - No Boucherot cells
 - Internally fixed gain (30 dB)
 - No SVR capacitor
- Standby function (CMOS compatible)
- Programmable turn-on/off delay
- No audible pop during mute and stand-by operations

Protections

- Short circuit (to GND, to V_S , across the load)
- Very inductive loads
- Chip over temperature
- Load dump
- Open GND
- ESD

Description

The TDA7391PD is a bridge class AB audio power amplifier specially intended for car radio high power applications.

The high power capability together with the possibility to operate either in differential input mode or single ended input mode makes it suitable for boosters and high end car radio equipment. The exclusive fully complementary output stage and the internal fixed gain configuration drop the external component count.

The on board clipping detector allows easy implementation of gain compression systems.

Table 1. Device summary

| Order code | Package | Packing |
|---------------|---------------------|---------------|
| E-TDA7391PD | PowerSO20 | Tube |
| E-TDA7391PDTR | PowerSO20 | Tape and reel |
| TDA7391PDU | PowerSO20 (slug-up) | Tube |
| TDA7391PDUTR | PowerSO20 (slug-up) | Tape and reel |

2 Pins description

Figure 3. Pins connection (top view)

Table 2. Pins function

| Pin | Function | Description |
|------------------|-----------|--|
| 14, 15 | INPUTS | The input stage is a high impedance type also capable of operation in single ended mode with one input capacitively coupled to the signal GND. The impedance seen by the inverting and non inverting input pins must be matched. |
| 5, 16 | $^{+}V_S$ | Supply voltage. |
| 17 | CD | The TDA7391PD is equipped with a diagnostic circuitry able to detect the clipping in the Output Signal (distortion = 10%). The CD pin (open collector) gives out low level signal during clipping. |
| 2, 19 | OUTPUTS | The output stage is a bridge type able to drive loads as low as 3.2Ω . It consists of two class AB fully complementary PNP/NPN stages fully protected. A rail to rail output voltage swing is achieved without need of bootstrap capacitors. No external compensation is necessary. |
| 1, 10, 11, 20 | GND | Power Ground. |
| 12 | S-GND | Signal ground. |
| 4 | STAND-BY | The device features a ST-BY function which shuts down all the internal bias supplies when the ST-BY pin is low. In ST-BY mode the amplifier sinks a small current (in the range of few μA). When the ST-BY pin is high the IC becomes fully operational. |
| 8 | SYNC | A resistor (R_2) has to be connect between pin 8 and GND in order to program the current that flows in the C_3 capacitor (pin 9). The values of C_3 and R_2 determine the time required to bias the amplifier. |
| 9 | MUTE | The pin will have a capacitor (C_3) tied to GND to set the MUTE/STAND-BY time. An automatic Mute during turn on/off is provided to prevent noisy transients. |

3 Electrical specifications

3.1 Absolute maximum ratings

Table 3. Absolute maximum ratings

| Symbol | Parameter | Value | Unit |
|----------------|---|------------|------|
| V_S | DC supply voltage | 28 | V |
| V_{OP} | Operating supply voltage | 18 | V |
| V_{PEAK} | Peak supply voltage ($t = 50$ ms) | 50 | V |
| I_O | Output peak current repetitive ($f > 10$ Hz) | 4.5 | A |
| | Output peak current non repetitive | 6 | A |
| P_{tot} | Power dissipation ($T_{case} = 85$ °C) | 32 | W |
| T_{stg}, T_j | Storage and junction temperature | -40 to 150 | °C |

3.2 Thermal data

Table 4. Thermal data

| Symbol | Parameter | Value | Unit |
|-----------------|-------------------------------------|-------|--------|
| $R_{th j-case}$ | Thermal resistance junction-to-case | Max. | 2 °C/W |

3.3 Electrical characteristics

$V_S = 14.4$ V; $R_L = 4$ Ω, $f = 1$ kHz, $T_{amb} = 25$ °C, unless otherwise specified.

Table 5. Electrical characteristics

| Symbol | Parameter | Test condition | Min. | Typ. | Max. | Unit |
|-----------------|-------------------------------|---------------------|------|------|------|------|
| V_S | Supply voltage range | - | 8 | - | 18 | V |
| I_q | Total quiescent current | - | - | 60 | 150 | mA |
| V_{OS} | Output offset voltage | - | - | - | 120 | mV |
| I_{SB} | Standby current | $V_{ST-BY} = 1.5$ V | - | - | 100 | μA |
| I_{SBin} | Standby input Bias current | $V_{ST-BY} = 5$ V | - | - | 10 | μA |
| V_{SBon} | Standby on threshold voltage | - | - | - | 1.5 | V |
| V_{SBoff} | Standby off threshold voltage | - | 3.5 | - | - | V |
| $ATT_{Standby}$ | Standby attenuation | - | - | 90 | - | dB |
| $I_{M in}$ | Mute input bias current | ($V_{MUTE} = 5$ V) | - | - | 10 | μA |
| A_M | Mute attenuation | - | - | 90 | - | dB |

Table 5. Electrical characteristics (continued)

| Symbol | Parameter | Test condition | Min. | Typ. | Max. | Unit |
|---------------------|--|--|------|------|------|------|
| P_O | Output power | $d = 10\%$ | 20 | 26 | - | W |
