# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

### **REMINDERS FOR USING THESE PRODUCTS**

Before using these products, be sure to request the delivery specifications.

### SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

<ul> <li>If overheated, a short circuit, performance deterioration, or lifespan shortening mails overheated, a short circuit, performance deterioration, or lifespan shortening mails when embedding a printed circuit board where a chip is mounted to a set, be surful the overall distortion of the printed circuit board and partial distortion such as at set.</li> <li>Self heating (temperature increase) occurs when the power is turned ON, so the design.</li> <li>Carefully lay out the coil for the circuit board design of the non-magnetic shield ty A malfunction may occur due to magnetic interference.</li> <li>Use a wrist band to discharge static electricity in your body through the grounding.</li> <li>Do not expose the products to magnets or magnetic fields.</li> <li>Do not use for a purpose outside of the contents regulated in the delivery specific.</li> </ul>	rate. (salt, acid, alkali, etc.). reen the solder temperature and chip temperature determined in the specifications. y occur. e that residual stress is not given to the chip due to crew tightening portions. plerance should be sufficient for the set thermal
<ul> <li>Do not use or store in locations where there are conditions such as gas corrosion</li> <li>Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference betw does not exceed 150°C.</li> <li>Soldering corrections after mounting should be within the range of the conditions If overheated, a short circuit, performance deterioration, or lifespan shortening main When embedding a printed circuit board where a chip is mounted to a set, be sure the overall distortion of the printed circuit board and partial distortion such as at sticks.</li> <li>Self heating (temperature increase) occurs when the power is turned ON, so the design.</li> <li>Carefully lay out the coil for the circuit board design of the non-magnetic shield ty A malfunction may occur due to magnetic interference.</li> <li>Use a wrist band to discharge static electricity in your body through the grounding Do not expose the products to magnets or magnetic fields.</li> <li>Do not use for a purpose outside of the contents regulated in the delivery specific The products listed on this catalog are intended for use in general electronic equi equipment, home appliances, amusement equipment, computer equipment, pers equipment, industrial robots) under a normal operation and use condition. The products are not designed or warranted to meet the requirements of the appli quality require a more stringent level of safety or reliability, or whose failure, malfu</li> </ul>	(salt, acid, alkali, etc.). reen the solder temperature and chip temperature determined in the specifications. y occur. e that residual stress is not given to the chip due to crew tightening portions. plerance should be sufficient for the set thermal

#### INDUCTORS

### Inductors for Power Circuits

**Thin-film Metal** 

# **Overview of TFM201610GHM Type**

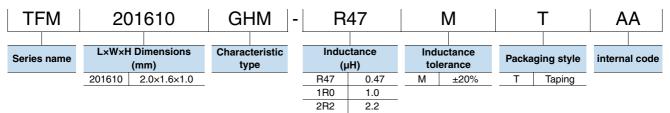

#### FEATURES

- O By using metal magnetic material with high Saturation magnetic flux density the excellent DC bias characteristics needed for inductors for power circuits can be achieved.
- With the same product shape and terminal structure as general chip parts it has excellent mounting stability characteristics and can also be mounted to general-purpose land patterns.
- O By using a closed magnetic circuit structure leakage flux is minimized.

#### APPLICATION

Smart phones, tablet terminals, HDDs, SSDs, DVCs, DSCs, mobile display panels, portable game devices, compact power supply modules, other

#### PART NUMBER CONSTRUCTION

#### OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

	Temperat	ure range	Package quantity	Individual weight
Туре	Operating temperature*	Storage temperature**		
	(° <b>C</b> )	(° <b>C</b> )	(pieces/reel)	(mg)
TFM201610GHM	-40 to +125	-40 to +85	3000	18

\* Operating temperature range includes self-temperature rise.

\*\* The Storage temperature range is for after the circuit board is mounted.

RoHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

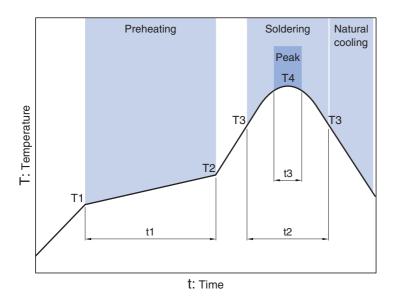

O Halogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.

Please be sure to request delivery specifications that provide further details on the features and specifications of the products for proper and safe use. Please note that the contents may change without any prior notice due to reasons such as upgrading.

#### ELECTRICAL CHARACTERISTICS

#### **CHARACTERISTICS SPECIFICATION TABLE**

L		L measuring frequency	DC resistance R		Rated current*			Part No.	
					Isat		Itemp		
(µH)	Tolerance	(MHz)	(m $\Omega$ )max.	(m $\Omega$ )typ.	(A)max.	(A)typ.	(A)max.	(A)typ.	
0.47	±20%	1.0	41	32	4.7	5.0	3.9	4.4	TFM201610GHM-R47MTAA
1.0	±20%	1.0	60	50	3.6	3.8	3.1	3.4	TFM201610GHM-1R0MTAA
2.2	±20%	1.0	152	142	2.4	2.6	1.9	2.1	TFM201610GHM-2R2MTAA

\* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (30% below the nominal L value)

Itemp: When based on the temperature increase (Temperature increase of 40°C by self heating)

#### ○ Measurement equipment
