## Thermally Conductive Liquid Gap Filling Material

### Description

TG4040-2K is a thermally conductive, liquid gap filling material. The product is supplied as two components which can be cured at room temperature or at an elevated temperature to give excellent thermal and mechanical performance. TG4040-2K offers an excellent solution for the thermal management of fragile components or those where surface topography would prevent the use of conventional materials. Upon curing the material offers excellent thermal performance and also reduces stresses due to CTE mismatches.

### Applications

Automotive electronics  
Fibre optic telecommunications equipment  
Consumer Electronics

### Storage

TG4040-2K has a shelf life of 12 months from the date of manufacture, as indicated by the lot number, when stored in the original unopened container.
