

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Low-noise JFET quad operational amplifier

Datasheet - production data

Related products

- See TL071 for single version
- See TL072 for dual version

Description

The TL074, TL074A, and TL074B are high-speed JFET input single operational amplifiers. Each of these JFET input operational amplifiers incorporates well matched, high-voltage JFET and bipolar transistors in a monolithic integrated circuit.

The devices feature high slew rates, low input bias and offset currents, and low offset voltage temperature coefficient.

Features

- Wide common-mode (up to V_{CC}^+) and differential voltage range
- Low input bias and offset current
- Low noise $e_n = 15 \text{ nV}/\sqrt{\text{Hz}}$ (typ)
- Output short-circuit protection
- High input impedance JFET input stage
- Low harmonic distortion: 0.01% (typical)
- Internal frequency compensation
- Latch up free operation
- High slew rate: $16 \text{ V}/\mu\text{s}$ (typical)

1 Schematic diagram

Figure 1. Circuit schematic

2 Absolute maximum ratings and operating conditions

Table 1. Absolute maximum ratings

Symbol	Parameter	Value		Unit
		TL074I, AI, BI	TL074C, AC, BC	
V _{CC}	Supply voltage ⁽¹⁾	±18		V
V _i	Input voltage ⁽²⁾	±15		
V _{id}	Differential input voltage ⁽³⁾	±30		
P _{tot}	Power dissipation	680		mW
R _{thja}	Thermal resistance junction to ambient ⁽⁴⁾⁽⁵⁾ SO14	105		°C/W
R _{thjc}	Thermal resistance junction to case ⁽⁴⁾⁽⁵⁾ SO14	31		
	Output short-circuit duration ⁽⁶⁾	Infinite		
T _{oper}	Operating free-air temperature range	-40 to +125	0 to +70	°C
T _{stg}	Storage temperature range	-65 to +150		
ESD	HBM: human body model ⁽⁷⁾	1		kV
	MM: machine model ⁽⁸⁾	200		V
	CDM: charged device model ⁽⁹⁾	1.5		kV

- All voltage values, except differential voltage, are with respect to the zero reference level (ground) of the supply voltages where the zero reference level is the midpoint between V_{CC}⁺ and V_{CC}⁻.
- The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 volts, whichever is less.
- Differential voltages are the non-inverting input terminal with respect to the inverting input terminal.
- Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuits on all amplifiers.
- R_{th} are typical values.
- The output may be shorted to ground or to either supply. Temperature and/or supply voltages must be limited to ensure that the dissipation rating is not exceeded.
- Human body model: 100pF discharged through a 1.5kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
- Machine model: a 200pF cap is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5Ω), done for all couples of pin combinations with other pins floating.
- Charged device model: all pins plus package are charged together to the specified voltage and then discharged directly to the ground.

8 Revision history

Table 6. Document revision history

Date	Revision	Changes
28-Mar-2001	1	Initial release.
30-Jul-2007	2	Added values for R_{thja} , R_{thjc} and ESD in Table 1: Absolute maximum ratings . Added Table 2: Operating conditions . Expanded Table 5: Order codes . Format update.
07-Jul-2008	3	Removed information concerning military temperature ranges (TL074Mx, TL074AMx, TL074BMx). Added automotive grade order codes in Table 5: Order codes .
04-Jul-2012	4	Removed commercial types TL074IYD, TL074AIYD, TL074BIYD. Updated Table 5: Order codes .
22-Nov-2013	5	Added Related products on first page Removed DIP package mechanical information Table 5: Order codes : – removed commercial types related to DIP package: TL074IN, TL074AIN, TL074BIN, TL074CN, TL074ACN, TL074BCN; – removed commercial types related to tube packing: TL074ID, TL074AID, TL074BID, TL074CD, TL074ACD, TL074BCD; – changed operating temperature range for TL074IDT, TL074AIDT, TL074BIDT, TL074IYDT, TL074AIYDT, TL074BIYDT from -40 °C, +105 °C to -40 °C, +125 °C; – updated footnote for automotive parts.
