## Tweezers - Straight (ESD Safe)

TOL-10603 RoHS

**Description:** You can tell by our large assortment of tweezers that we here at SparkFun are way into picking up tiny things. To make sure we're always up to date on the latest in 'tweezing' technology, we're always buying and testing new tweezers. Okay... tweezers aren't exactly the most exciting thing in the world, but they are super handy.

These are nice, solid straight tweezers. They have a very fine tip which allows you to pick up very small parts with precision. This is a great tool to have if you're working with surface mount components or anything with very small parts. The ESD-safe coating will also help prevent electrostatic damage to sensitive electronic components. The best part? They're bright red and have the SparkFun logo printed right on them!
