mail

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

TOSHIBA Transistor Silicon NPN Epitaxial Type

TPCP8701

Portable Equipment Applications Switching Applications Inverter Lighting Applications

- Small footprint due to small and thin package
- High DC current gain : $h_{FE} = 400$ to 1000 (IC = 0.3 A)
- Low collector-emitter saturation : V_{CE} (sat) = 0.14 V (max)
- High-speed switching : $t_f = 120 \text{ ns}$ (typ.)

Maximum Ratings (Ta = 25°C)

Characteristics		Symbol	Rating	Unit	
Collector-base voltage		V _{CBO}	100	V	
Collector-emitter voltage		V _{CEX}	80	V	
		V _{CEO}	50	V	
Emitter-base voltage		V _{EBO}	7	V	
Collector current	DC (Note 1)	Ι _C	3.0	A	
	Pulse (Note 1)	I _{CP}	5.0		
Base current		Ι _Β	300	mA	
Collector power dissipation (t = 10s)	Single-device operation		1.77	w	
	Single-device value at dual operation	Pc (Note 2)	0.95		
Collector power dissipation (DC)	Single-device operation		0.94	w	
	Single-device value at dual operation	Pc (Note 2)	0.54		
Junction temperature		Tj	150	°C	
Storage temperature range		T _{stg}	-55 to 150	°C	

Note 1: Please use devices on condition that the junction temperature is below 150°C.

Note 2: Mounted on FR4 board (glass epoxy, 1.6 mm thick, Cu area: 645 mm^2) Note 3: • on lower left on the marking indicates Pin 1.

※ Weekly code: (Three digits)

Week of manufacture

(01 for first week of year, continues up to 52 or 53)

Year of manufacture (One low-order digits of calendar year)

Weight: 0.017 g (typ.)

TOSHIBA

Permissible Power Dissipation for Simultaneous Operation

Collector power dissipation at the single-device value at dual operation is 0.54W.

Collector power dissipation at the dual operation is set to 1.08W.

RESTRICTIONS ON PRODUCT USE

030619EAA

- The information contained herein is subject to change without notice.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of TOSHIBA or others.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.

In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..

- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- TOSHIBA products should not be embedded to the downstream products which are prohibited to be produced and sold, under any law and regulations.
