NOTES

1. Packing style

1) The relay is packed in a tube with the relay orientation mark on the left side, as shown in the figure below.

2) Tape and reel packing (surface-mount terminal type)

(1) Tape dimensions

(i) SA type

(ii) SL, SS type

(2) Dimensions of plastic reel

2. Automatic insertion

To maintain the internal function of the relay, the chucking pressure should not exceed the values below.

- Chucking pressure in the direction A: 9.8 N {1 kgf} or less
- Chucking pressure in the direction B: 9.8 N {1 kgf} or less
- Chucking pressure in the direction C: 9.8 N {1 kgf} or less

Please chuck the portion. Avoid chucking the center of the relay. In addition, excessive chucking pressure to the pinpoint of the relay should be avoided.

**For general cautions for use, please refer to the "Cautions for use of Signal Relays" or "General Application Guidelines".**
