mail

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

IR Receiver Modules for Remote Control Systems

www.vishay.com

ORDERING CODE

Taping: TSOP37...TT1 - top view taped TSOP37...TT2 - top view taped

FEATURES

- Very low supply current
- · Photo detectors and preamplifier in one package
- Internal filter for PCM frequency
- Supply voltage: 2.5 V to 5.5 V
- Improved immunity against ambient light
- Insensitive to supply voltage ripple and noise
- External metal shield
- Material categorization:
- for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

DESCRIPTION

The TSOP372..H, TSOP374..H series are miniaturized receiver modules for infrared remote control systems. A PIN diode and a preamplifier are assembled on a PCB, the epoxy lens cap is designed as an IR filter.

The demodulated output signal can be directly connected to a microprocessor for decoding. The TSOP372..H, TSOP374..H are optimized to suppress almost all spurious pulses from energy saving lamps like CFLs. The AGC4 used in the TSOP374.. may suppress some data signals. The TSOP372..H is a legacy product for all common IR remote control data formats. Between these two receiver types, the TSOP374..H is preferred. Customers should initially try the TSOP374..H in their design.

These components have not been qualified according to automotive specifications.

PARTS TABLE					
AGC		LEGACY, FOR LONG BURST REMOTE CONTROLS (AGC2)	RECOMMENDED FOR LONG BURST CODES (AGC4) ⁽¹⁾		
	36 kHz	TSOP37236H	TSOP37436H ⁽²⁾⁽³⁾⁽⁴⁾		
Carrier	38 kHz	TSOP37238H	TSOP37438H ⁽⁵⁾⁽⁶⁾⁽⁹⁾

	56 kHz	TSOP37256H	TSOP37456 H(7)(8)		
Package		Belobog shield			
Pinning		1 = OUT, 2, 3, 6, 7, 8 = GND, 4, 5 = V _S			
Dimensions	; (mm)	4.3 W x 4.3 H x 1.0 D			
Mounting		SMD			
Application		Remote control			
Best remote control code		⁽²⁾ RC-5 ⁽³⁾ RC-6 ⁽⁴⁾ Panasonic ⁽⁵⁾ NEC ⁽⁶⁾ Sharp ⁽⁷⁾ r-step ⁽⁸⁾ Thomson RCA ⁽⁹⁾ r-map			

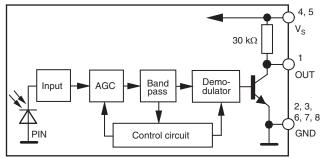

Note

⁽¹⁾ We advise try AGC4 first if the burst length is unknown.

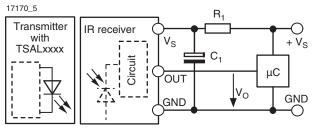

Vishay Semiconductors

BLOCK DIAGRAM

APPLICATION CIRCUIT

 $\rm R_1$ and $\rm C_1$ are recommended for protection against EOS. Components should be in the range of 33 Ω < $\rm R_1$ < 1 k Ω , $\rm C_1$ > 0.1 $\mu F.$

ABSOLUTE MAXIMUM RATINGS				
PARAMETER	TEST CONDITION	SYMBOL	VALUE	UNIT
Supply voltage		Vs	-0.3 to +6	V
Supply current		I _S	3	mA
Output voltage		Vo	-0.3 to (V _S + 0.3)	V
Output current		lo	5	mA
Junction temperature		Tj	100	°C
Storage temperature range		T _{stg}	-25 to +85	°C
Operating temperature range		T _{amb}	-25 to +85	°C
Power consumption	T _{amb} ≤ 85 °C	P _{tot}	10	mW

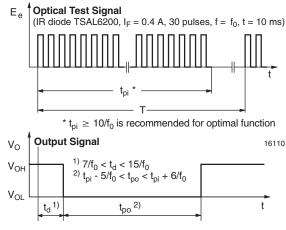

Note

• Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect the device reliability.

ELECTRICAL AND OPTICAL CHARACTERISTICS (T _{amb} = 25 °C, unless otherwise specified)						
PARAMETER	TEST CONDITION	SYMBOL	MIN.	TYP.	MAX.	UNIT
Supply voltage		Vs	2.5		5.5	V
Supply current	$V_{S} = 3.3 V, E_{v} = 0$	I _{SD}	0.27	0.35	0.45	mA
Supply current	$E_v = 40$ klx, sunlight	I _{SH}		0.45		mA
Transmission distance	$E_v = 0$, IR diode TSAL6200, $I_F = 200$ mA, test signal see fig. 1	d		45		m
Output voltage low	$I_{OSL} = 0.5 \text{ mA}, E_e = 0.7 \text{ mW/m}^2,$ test signal see fig. 1	V _{OSL}			100	mV
Minimum irradiance	Pulse width tolerance: $t_{pi} - 5/f_o < t_{po} < t_{pi} + 6/f_{o,}$ test signal see fig. 1	E _{e min.}		0.12	0.25	mW/m ²
Maximum irradiance	t _{pi} - 5/f _o < t _{po} < t _{pi} + 6/f _o , test signal see fig. 1	E _{e max.}	30			W/m ²
Directivity	Angle of half transmission distance	Φ1/2		± 75		deg

SUITABLE DATA FORMAT

The TSOP372...H, TSOP374..H series is designed to suppress spurious output pulses due to noise or disturbance signals. The devices can distinguish data signals from noise due to differences in frequency, burst length, and envelope duty cycle. The data signal should be close to the device's band-pass center frequency (e.g. 38 kHz) and fulfill the conditions in the table below.

www.vishay.com

When a data signal is applied to the TSOP372..H, TSOP374..H in the presence of a disturbance, the sensitivity of the receiver is automatically reduced by the AGC to insure that no spurious pulses are present at the receiver's output. Some examples which are suppressed are:

- DC light (e.g. from tungsten bulbs sunlight)
- · Continuous signals at any frequency
- Strongly or weakly modulated patterns from fluorescent lamps with electronic ballasts (see figure 13 or figure 14)

Vishay Semiconductors

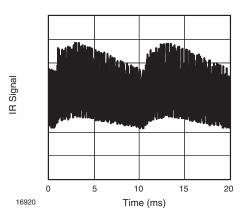

Fig. 13 - IR Signal from Fluorescent Lamp with Low Modulation

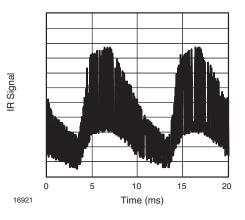

Fig. 14 - IR Signal from Fluorescent Lamp with High Modulation

	TSOP372H	TSOP374H
Minimum burst length	10 cycles/burst	10 cycles/burst
After each burst of length a minimum gap time is required of	10 to 70 cycles ≥ 10 cycles	10 to 35 cycles ≥ 10 cycles
For bursts greater than a minimum gap time in the data stream is needed of	70 cycles > 4 x burst length	35 cycles > 10 x burst length
Maximum number of continuous short bursts/second	1800	1500
NEC code	yes	preferred
RC5/RC6 code	yes	preferred
Thomson 56 kHz code	yes	preferred
Sharp code	yes	preferred
Suppression of interference from fluorescent lamps	Most common disturbance patterns are suppressed	Even extreme disturbance patterns are suppressed

Notes

• For data formats with short bursts (less than 10 carrier cycles) please see the datasheet for TSOP373..H, TSOP375..H

 Best choice of AGC for some popular IR-codes: TSOP37436: RC-5, RC-6, Panasonic;

TSOP37438: NEC, Sharp, r-step;

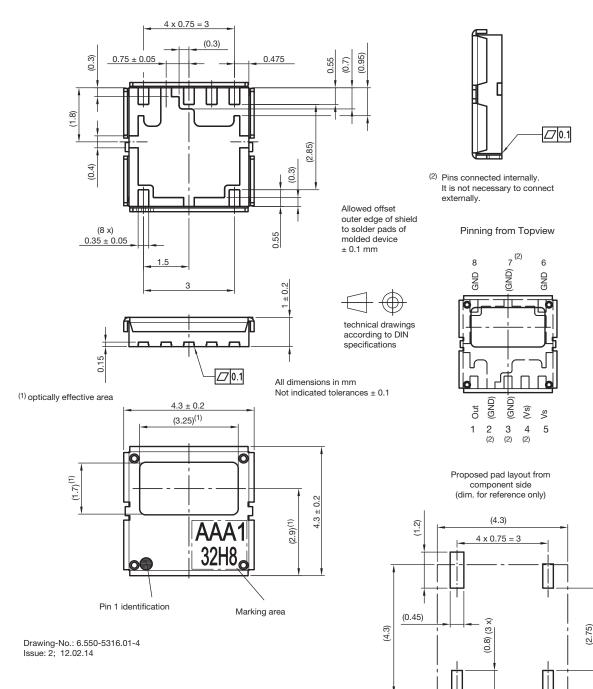

TSOP37456: r-step, Thomson RCA

• For Sony 12, 15, and 20 bit IR-codes please see the datasheet of TSOP37S40H

Vishay Semiconductors

Reflow Soldering

• Reflow soldering must be done within 168 h while stored under a max. temperature of 30 °C, 60 % RH after opening the dry pack envelope

www.vishay.com

- Set the furnace temperatures for pre-heating and heating in accordance with the reflow temperature profile as shown in the diagram. Exercise extreme care to keep the maximum temperature below 260 °C. The temperature shown in the profile means the temperature at the device surface. Since there is a temperature difference between the component and the circuit board, it should be verified that the temperature of the device is accurately being measured
- Handling after reflow should be done only after the work surface has been cooled off

LABEL

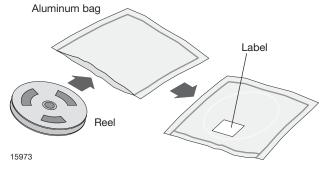

Standard bar code labels for finished goods

The standard bar code labels are product labels and used for identification of goods. The finished goods are packed in final packing area. The standard packing units are labeled with standard bar code labels before transported as finished goods to warehouses. The labels are on each packing unit and contain Vishay Semiconductor GmbH specific data.

DRY PACKING

The reel is packed in an anti-humidity bag to protect the devices from absorbing moisture during transportation and storage.

FINAL PACKING

The sealed reel is packed into a cardboard box. A secondary cardboard box is used for shipping purposes.

9

RECOMMENDED METHOD OF STORAGE

Dry box storage is recommended as soon as the aluminum bag has been opened to prevent moisture absorption. The following conditions should be observed, if dry boxes are not available:

- Storage temperature 10 °C to 30 °C
- Storage humidity \leq 60 % RH max.

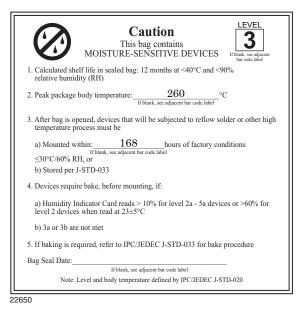

After more than 168 h under these conditions moisture content will be too high for reflow soldering.

In case of moisture absorption, the devices will recover to the former condition by drying under the following condition: 192 h at 40 °C + 5 °C / - 0 °C and < 5 % RH (dry air / nitrogen) or

96 h at 60 $^\circ\text{C}$ + 5 $^\circ\text{C}$ and < 5 % RH for all device containers or

24 h at 125 °C + 5 °C not suitable for reel or tubes.

An EIA JEDEC[®] standard J-STD-020 level 3 label is included on all dry bags.

EIA JEDEC standard J-STD-020 level 3 label is included on all dry bags

Vishay Semiconductors

ESD PRECAUTION

Proper storage and handling procedures should be followed to prevent ESD damage to the devices especially when they are removed from the antistatic shielding bag. Electrostatic sensitive devices warning labels are on the packaging.

VISHAY SEMICONDUCTORS STANDARD BAR CODE LABELS

The Vishay Semiconductors standard bar code labels are printed at final packing areas. The labels are on each packing unit and contain Vishay Semiconductors specific data.

Material Category Policy

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as RoHS-Compliant fulfill the definitions and restrictions defined under Directive 2011/65/EU of The European Parliament and of the Council of June 8, 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) - recast, unless otherwise specified as non-compliant.

Please note that some Vishay documentation may still make reference to RoHS Directive 2002/95/EC. We confirm that all the products identified as being compliant to Directive 2002/95/EC conform to Directive 2011/65/EU.

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as Halogen-Free follow Halogen-Free requirements as per JEDEC JS709A standards. Please note that some Vishay documentation may still make reference to the IEC 61249-2-21 definition. We confirm that all the products identified as being compliant to IEC 61249-2-21 conform to JEDEC JS709A standards.
