

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Features

- Completely Alignment-free
- PLL Demodulator for FM Intercarrier Sound IF Signals (Mono)
- Two Audio Switches
- Very Few External Components
- Volume Control by DC Voltage
- Supply Voltage: 5V
- Pb-free Package, which is Compliant with Requirements of RoHS

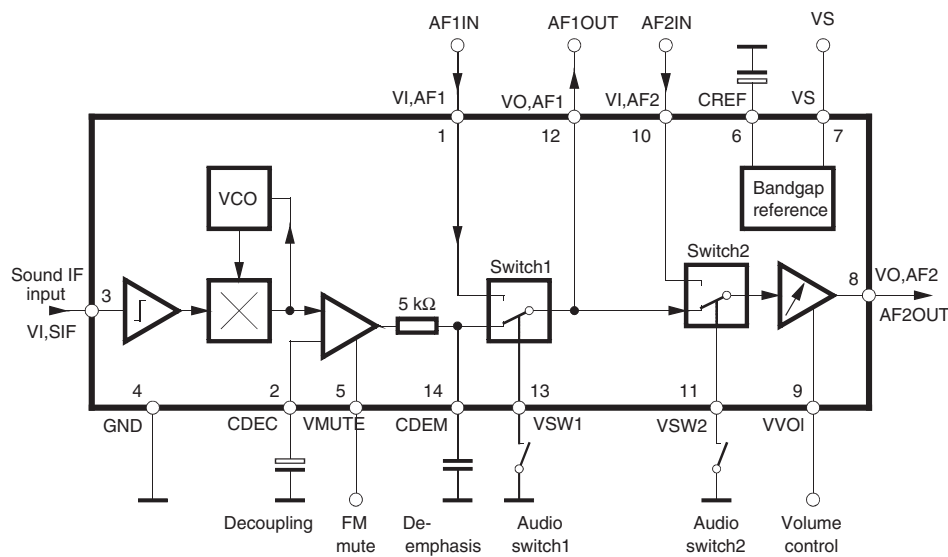

Mono FM Sound Demodulator for TV Systems

1. Description

The U2861B is an alignment-free FM sound IF demodulator for all TV standards from 4.5 MHz up to 6.5 MHz (standard M, N, B/G, I, D/K). The circuit includes two switchable audio inputs and volume control. With a supply voltage of 5V, the U2861B is suitable for TV, VCR and Multimedia applications.

Figure 1-1. Block Diagram

2. Circuit Description

Sound IF Limiter Amplifier

The intercarrier signal coming from the sound filter is fed to a 7-stage limiter amplifier. This guarantees high input sensitivity and excellent AM suppression.

2.1 PLL - FM Demodulator

The alignment-free "Phase-Locked-Loop" (PLL) FM demodulator covers a wide frequency range of 4.5 MHz up to 6.5 MHz with excellent noise performance.

Due to the fact that the voltage-to-frequency characteristic is linear, a low harmonic distortion can be achieved. The free-running frequency of the internal VCO circuit is about 5.5 MHz.

The demodulated FM signal is led via de-emphasis and buffered to pin 12. The de-emphasis low-pass filter consists of an internal 5-k Ω series resistor and an external capacitor at pin 14. The FM muting is possible by switching pin 5 to ground.

2.2 Audio Switch 1

The first audio switch (pin 13) has inputs for the demodulated FM signal and the external AF1 signal from pin 1.

For multistandard purposes, it is possible to handle internal FM and external AM audio signals. The output of switch1 is also permanently available at pin 12 (e.g., for SCART interface).

2.3 Audio Switch 2 and Volume Control

The second audio switch (pin 11) has inputs for the audio signal from switch 1 and the external AF2 signal at pin 10. The switched AF signal is fed to volume control. The output voltage can be controlled by a DC voltage at pin 9.

2.4 Internal Voltage Stabilizer

The internal band-gap reference ensures constant performance independent of supply voltage and temperature.

3. Pin Configuration

Table 3-1. Pin Description

Pin	Symbol	Function
1	VI,AF1	Audio input 1 (e.g., AM signal)
2	CDEC	Decoupling capacitor
3	VI,SIF	FM sound IF input
4	GND	Ground
5	VMUTE	FM mute switch
6	CREF	Internal reference voltage
7	VS	Supply voltage
8	VO,AF2	Switched audio output 2
9	VVOL	Volume control
10	VI,AF2	Audio input 2 (e.g., from SCART)
11	VSW2	Audio switch 2
12	VO,AF1	Switched audio output 1
13	VSW1	Audio switch 1
14	CDEM	De-emphasis and mute switch

4. Absolute Maximum Ratings

Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Reference point pin 4, unless otherwise specified.
