

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# usb<sup>2</sup>Demon™

The usb<sup>2</sup>Demon is a BDM/JTAG interface used in the design, debug, and programming of microprocessor and microcontroller based embedded systems. One side of the usb<sup>2</sup>Demon interfaces to a USB 1.1 or USB 2.0 port of a host PC and the other side connects to an OCD (On-Chip Debug) port on the target system. As with all Macraigor interface devices, the usb<sup>2</sup>Demon can simultaneously debug up to 255 devices on a single scan chain. In addition, up to 16 usb<sup>2</sup>Demons can be connected to a single host machine.

The usb<sup>2</sup>Demon is designed to be a major upgrade from the Wiggler series of OCD connections and, for many targets, is also significantly faster than a Raven. It supports configurable JTAG/BDM clock rates up to 20 MHz .

The usb<sup>2</sup>Demon is compatible with Windows and Linux hosts. Supported versions of Linux are Red Hat 7.2 – 9 and Fedora Core 2.

**List Price: \$750**

Complete JTAG Debug Support

## Supported Debuggers and Tools

The usb<sup>2</sup>Demon is fully compatible with all of Macraigor's software tools, including our free OCD Commander debugger, free GNU toolkit distributions, OCD Flash Programmer application, and our production line test tools.

In addition, several commercial third-party debuggers can interface to the usb<sup>2</sup>Demon. A partial list of our debugger partners includes:

- Accelerated Technology/ Mentor Graphics
- Allant (ARM)
- Arc (Metaware)
- Altium
- DDC-I
- Green Hills Software
- IAR Systems
- Metrowerks
- Microcross
- Microsoft
- Paradigm Systems
- Red Hat
- Viosoft

*For a complete list of compatible debuggers, please visit our web site.*

## Theory of Operation

The usb<sup>2</sup>Demon operates as a converter between the target JTAG/BDM signals and host debugging commands. Power is supplied by the USB interface so that no external supply is necessary. The buffers that interface to the target OCD signals are powered by the target itself, allowing the usb<sup>2</sup>Demon to automatically match target voltages between 5.0 V and 2.2 V.

## Supported Processors

<b>AMCC:</b>	PPC405, PPC440
<b>AMD:</b>	SC520, Athlon, Duron, AU1000, AU1100, AU15x0
<b>ARM:</b>	7TDMI, 710T, 720T, 740T, 9TDMI, 920T, 922T, 940T, 946T, 1136J-S
<b>Broadcom:</b>	BCM1250, BCM7115
<b>Freescal:</b>	MC9328MX1, 56300, 56600, 56800, StarCore, 683xx, MPC603e, MPC8xx, MPC5xx, MPC5554, MPC740, MPC745, MPC750, MPC755, MPC8240, MPC8245, MPC8247/8248, MPC8250, MPC8255, MPC8260, MPC8264/65/66, MPC8270/71/72, MPC8280, MPC8540, MPC8560, MPC8541, MPC8555
<b>IBM:</b>	PPC603e, PPC740, PPC750
<b>IDT:</b>	RC323xx
<b>Intel XScale® Technology:</b>	PXA21x, PXA25x, PXA26x, PXA27x, IOP3xx, IXC1100, IXP42x, IXP46x, IXP24xx, IXP28xx, 80200, 80219, 8032x, 8033x
<b>MIPS:</b>	4Kc/p/m/e, 5Kc
<b>NEC:</b>	VR5432, VR5500
<b>Net Silicon:</b>	NetARM+10, NetARM+40, NetARM+50, NS7520, NS9750
<b>PLX:</b>	IOP480
<b>Phillips:</b>	PR1900
<b>Toshiba:</b>	TX49
<b>Transmeta:</b>	Efficeon
<b>Triscend:</b>	E5, A7

## Macraigor Systems LLC

**www.macraigor.com • Sales Inquiries: 206-855-9269**

Macraigor Systems is a leading supplier of BDM/JTAG connection solutions for on-chip debugging of 32 and 64-bit embedded microprocessors. Macraigor Systems' solutions are designed for price-sensitive customers. These solutions include a suite of software tools that supports Windows 9x, NT, ME, XP, Linux and Solaris host systems. Macraigor Systems supports all major embedded microprocessor architectures, including AMD, ARM, ColdFire, CPU32 Series, PowerPC, MIPS and the XScale microarchitecture.
