2.6 I2C Host Interface Protocol

I2C Slave Interface

Read

Write

2.6.1 Register Read

For reading register value from I2C device, host has to tell I2C device the *Start Register Address* before reading corresponding register value.

Figure 1. Register Read Format.

ST1232/ST1332 I2C host interface protocol supports *Repeated Register Read*. That is, once the *Start Register Address* has been set by host, consequent I2C Read(R) transactions will directly read register values starting from the *Start Register Address* without setting address first, as shown in Figure 2.

Figure 2. Repeated Register Read.

Header Value : 0xab

2.6.2 Register Write

For writing register to I2C device, host has to tell I2C device the *Start Register Address* in each I2C Register Write transaction. Register values to the I2C device will be written to the address starting from the *Start Register Address* described in Register Write I2C transaction as shown in Figure 3.

Figure 3. Register Write Format.

Header Value : 0xaa

2.6.3 Registers

ST1332 provides a register set for host to configure device attributes and retrieve information about fingers,

Host Interface Registers (Report Page)									
Reg Addr.	Name	Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0

Timeout to Idle Register provides timeout control to entering Idle Mode for host.

The touch controller will enter Idle Mode after the number of seconds specified in Timeout to Idle Register if there is no touch detected in this period.

Set the field to 0xFF will disable Idle Mode. Set the field to 0 will entering Mode immediately.

The default value of Timeout to Idle Register is set to 0x08 for 8 seconds to Idle Mode.

Reg Addr.	Name	Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0	
0x10	Fingers	Reserved				Fingers(RO)				

Fingers field represents number of fingers detected by touch controller.

The coordinates of each finger detected are represents in X Coordinate and Y Coordinate fields.

2.6.7 XY Coordinate Registers

Reg Addr.	Name	Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0
0x12	XY0 Coord (High Byte)	Valid 0 (RO)	X0_H(RO)			Reserved	Y0_H (RO)		
0x13	X0 Coord (Low Byte)	X0_L(RO)							
0x14	Y0 Coord (Low Byte)	Y0_L(RO)							
0x15	XY1 Coord (High Byte)	Valid 1 (RO)	X1_H(RO)			Reserved	Y1_H (RO)		
0x16	X1 Coord (Low Byte)	X1_L(RO)							
0x17	Y1 Coord (Low Byte)	Y1_L(RO)							

XY Coordinate Registers represent the XY coordinates for each touch point ID.

Valid bit field tells that this point ID is valid and the XY information represents a real touch point on touch sensor.

5. PRODUCT HANDLING AND APPLICATION

¼ PRECAUTION FOR HANDLING LCM

- i' The LCD module contains a C-MOS LSI. People who operate the LCM should wear ESD protection equipment to prevent ESD hurt on products.
- i' Do not input any signal before power is turned on.
- i' Do not take LCM from its packaging bag until it is assembled.
- i' Peel off the LCM protective film slowly since static electricity may be generated.
- i' Pay attention to the humidity of the work shop, 50~60%RH is satisfactory.
- i' Use a non-leak iron for soldering LCM.
- i' Do not touch the display surface or connection terminals area with bare hands. Smudges on the display surface reduce the insulation between terminals.
- i' Cautions for soldering to LCM:
 - Condition for soldering I/O terminals:
 - Temperature at iron tip : $350\text{°C} \pm 15\text{°C}$.
 - Soldering time : 3~4sec./ terminals.
 - Type of solder : Eutectic solder (rosin flux filled).

¼ PRECAUTION IN USE OF LCM

- i' Do not contact or scratch the front surface and the contact pads of a LCM with hard materials such as metal or glass or with one's nail.
- i' To clean the surface, wipe it gently with soft cloth dampened by alcohol.
- i' Do not attempt to wipe off the contact pads.
- i' Keep LCM panels away from direct sunlight, also avoid them in high-temperature & high humidity environment for a long period.
- i' Do not drive LCM by DC voltage.
- i' Do not expose LCM to organic solvent.
- i' Liquid in LCM is hazardous substance. In case a contact with liquid crystal material is occurred, be sure to immediately wash such material away by soap and water.
- i' The polarizer is easily damaged and should be handled with special care. Don't press or rub it with hard objects.

¼ PRECAUTION FOR STORING AND USE OF LCM

- i' To avoid degradation of the device, do not store the module under the conditions of direct sunlight, high temperature or high humidity. Keep the module in bags designed to prevent static electricity charging under low temperature / normal humidity conditions (avoid high temperature / high humidity and low temperature below 0°C)
- i' Never use the LCD, LCM under 45 Hz, the liquid crystal will decompose and cause permanent damage on display !!

¼ USING ON MEDICAL CARE, SAFETY OR HAZARDOUS APPLICATION OR SYSTEM

- i' For the application in medical care, safety and hazardous products or systems, an authorization from URT is required. URT will not be responsible for any damage or loss which is caused by the products without any authorization given by URT.
- i' This product is not allowed to be designed and used for military application and/or purpose.
- i' The delivery of this product to the countries and/or regions where the embargoes are imposed by U.N. is prohibited.
- i' The application and delivery of this product must comply with Strategic High-Tech Commodities (SHTC) export control and the sales to the embargoed and/or sanctioned countries or regions are strictly prohibited.

6. DATE CODE OF PRODUCTS

i' Date code will be shown on each product :
