# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

#### **General Description**

The USBTO232 is an adapter board that converts a PC's USB port into a standard COM port. A COM port is also known as the standard serial port that uses Recommended Standard 232 (RS-232).

The USBTO232 is included with selected Maxim EV kits and EV systems that were originally designed for the PC COM port and later updated to also support the USB port. Data sheets for EV kits and EV systems that can use the USBTO232 have been updated to reflect compatibility and also provide ordering information. Use of the USBTO232 in applications other than those EV kits specified by Maxim is not supported.

**Important:** Before using the USBTO232, see the *Quick Start* section of this data sheet to correctly install the USB driver for the appropriate Windows<sup>®</sup> operating system.

#### \_Features

- USB Powered
- USB Driver for Windows 98SE/2000/XP Operating Systems
- USB and I/O Power LED Indicators
- Two GPIO LED Indicators
- USB Cable Included
- ♦ 8-Pin Signal Header
- Proven PCB Layout
- Fully Assembled and Tested

#### **\_Ordering Information**

PART	PC INTERFACE	OPERATING SYSTEMS SUPPORTED
USBTO232+	USB	Windows 98SE/2000/XP

+ Denotes lead-free and RoHS compliance.

\_ Maxim Integrated Products 1

For pricing, delivery, and ordering information, please contact Maxim/Dallas Direct! at 1-888-629-4642, or visit Maxim's website at www.maxim-ic.com.

#### \_Quick Start

The following instructions are for installing USB drivers and the EV kit software. Once the USB drivers and EV kit software have been installed, refer to the *Quick Start* section of the appropriate EV kit data sheet for EV kitspecific instructions.

#### **Recommended Equipment**

- USBTO232 board (USB cable included)
- Maxim EV kit (or EV system) with a COM port PC connection
- Corresponding EV kit data sheet
- User-supplied PC with a USB port

**Note:** In the following sections, software-related items are identified by bolding. Text in **bold** refers to items directly from the EV kit software. Text in **bold and underlined** refers to items from the Windows 98SE/2000/XP operating system.

- Procedure
   Visit the Maxim website (www.maxim-ic.com/evkitsoftware) to download the latest version of the EV kit software that supports USB. Save the EV kit software to a temporary folder and uncompress the file, if it is a .zip file.
- Install the EV kit software on your computer by running the INSTALL.EXE program inside the temporary folder. The program files are copied to
   <u>C:\Program Files\MAXxxxxx</u> and icons are created in the Windows <u>Start I Programs</u> menu.
- Uncompress the USB driver file copied into <u>C:\Program Files\MAXxxxx</u> after the software is installed. If you are using Windows 98SE, uncompress the <u>USB Driver 98 ME V1.09.zip</u> file. If you are using Windows 2000/XP, uncompress the <u>USB Driver XP 2K V2.00.zip</u> file. Uncompress the contents of the .zip file into <u>C:\Program</u> <u>Files\MAXxxxxx</u>.
- 4) Verify that the following USBTO232 jumpers are in the default positions:
  - JU1: (1-2)
  - JU2: (2-3)
  - JU3: (2-3)
- Connect the included USB cable from the PC's USB port (Type A) to the Type B USB connector on the USBTO232 board.
- Verify that the red VCC power LED (D1) lights up. Also verify that the green VCCIO power LED (D2) lights up.

7) Go to the appropriate USB *Driver Installation* section in this data sheet for the version of Windows you are using and return to step 8 when finished. For example, if you are using Windows XP, go to the *Windows XP USB Driver Installation* section.

Windows XP: Page 3

Windows 2000: Page 11

Windows 98SE: Page 25

- Connect the USBTO232 board to the EV kit (or EV system) by connecting the male DB9 connector on the USBTO232 board to the female DB9 connector on the EV kit.
- 9) Refer to the *Quick Start* section of the appropriate EV kit data sheet for further EV kit-specific instructions.

#### \_Detailed Description of Hardware

The USBTO232 is an adapter board that converts a PC's USB port into a standard COM port. The USBTO232 board has three configurable jumpers: JU1, JU2, and JU3. Jumper JU1 is the I/O supply selection (see Table 1), jumper JU2 is the USB power-supply indicator (see Table 2), and jumper JU3 is the 3.3V power-supply indicator (see Table 3).

#### Table 1. I/O Supply Selection (VCCIO)

JUMPER	SHUNT POSITION	DESCRIPTION
11.14	1-2*	VCCIO = VCC = 5V
JUT	2-3	VCCIO = VCC30 = 3.3V

\*Default position.

# Table 2. USB Power-Supply Indicator (VCC–D1)

JUMPER	SHUNT POSITION	DESCRIPTION
11.10	1-2	General-purpose LED connected to CBUS0
302	2-3*	Indicates USB power present when red LED (D1) is lit

\*Default position.

# Table 3. 3.3V Power-Supply Indicator (VCC30–D2)

JUMPER	SHUNT POSITION	DESCRIPTION
	1-2	General-purpose LED connected to CBUS1
JU3	2-3*	Indicates regulated 3.3V power present when green LED (D2) is lit

\*Default position.

#### Windows XP USB Driver Installation

 Once the USBTO232 board is connected to the PC for the first time in Windows XP, a <u>Found New</u> <u>Hardware Wizard I Welcome</u> window appears, as shown in Figure 1. Choose the <u>No, not this time</u> selection and press the <u>Next</u> button to get started. If you do not see a window that is similar to the one described above after 30 seconds, remove the USB cable from the USBTO232 board and reconnect it. Administrator privileges are required to install the USB device driver on Windows 2000/XP.

# Found New Hardware Wizard Welcome to the Found New Hardware Wizard Windows will search for current and updated software by looking on your computer, on the hardware installation CD, or on the Windows Update Web site (with your permission).
