

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

1. Description

The microUSB Programming Adaptor is a USB to TTL UART bridge converter which is simple, cost effective, very small and easy to use.

There are 2 versions of the microUSB Programming Adaptor, the uUSB-PA5 and the uUSB-PA5-II.

They both use a mini-B type USB connector to connect to your PC. The uUSB-PA5 is based on the FTDI FT232RQ USB to Serial Bridge IC from FTDI Chip, while the uUSB-PA5-II is based on the SiLabs CP2104 USB to Serial Bridge IC from Silicon Labs.

From the perspective of programming 4D Systems modules, both the uUSB-PA5 and uUSB-PA5-II operate in the same way.

They provide the User with multi baud rate serial data and access to additional signals such as flow control in a convenient 10 pin 2.54mm (0.1") pitch Dual-In-Line package.

The main 5 pin interface is a standard 2.54mm (0.1") pitch female header, designed to connect directly to a majority of the 4D Systems modules.

The uUSB-PA5 and uUSB-PA5-II are ideal for prototype or production.

RX and TX signals are both 3.3V and 5V tolerant.

2. Module Compatibility

The uUSB-PA5 was designed in 2012. The uUSB-PA5-II was designed in 2015 to replace the uUSB-PA5.

While a large range of 4D Systems modules are compatible with these programming adaptors, some are not, for mechanical reasons.

The following is a small list is of known modules that are not compatible with the uUSB-PA5/PA5-II.

- uLCD-28PT (note, this is not the PTU)
- uLCD-32PT (note, this is not the PTU)

Please use the 4D Programming cable instead, or simply connect the 5 way cable that ships with each module, between the uUSB-PA5/PA5-II and the display module, which overcomes this compatibility issue.

3. Features

- USB 2.0 compliant Full Speed 12Mbps maximum speed, Suspend supported.
- Hardware or Xon/Xoff handshaking supported, 300bps to 3Mbps (uUSB-PA5), 300bps to 2Mbps (uUSB-PA5-II)
- UART supports 7 or 8 data bits, 1-2 Stop bits, odd/even/mark/space and no parity (uUSB-PA5). 5, 6, 7, 8 data bits, 1, 1.5, 2 stop bits, odd/even/mark/space and no parity (uUSB-PA5-II)
- Power on reset circuit
- Virtual COM port drivers allow operation with existing COM port PC applications
- Supports Windows 2000 and above, MAC (OSX-8 and above) and Linux (2.4 kernel and above)
- USB powered
- -40 to +85 degrees Celsius temp range
- Small size, 33.7mm x 17.3mm
- Traffic/Operation LED indicates board status
- Additional flow control and features available for the user to solder, using standard 2.54mm (0.1") pitch through holes along each side of the PCB.
- RoHS Compliant

4. Pin Configuration and Summary

microUSB (uUSB-PA5) additional Pin Outs

Symbol	Description
RTS	Ready to Send Output (active low)
DTR	Data Terminal Ready Output (active low)
RESET	This pin provides a LOW level RESET pulse of several hundred micro seconds when the DTR signal is toggled.
TX	Serial Data Transmit output. This connects to the host Rx (Serial Receive) input.
RX	Serial Data Receive input. This connects to the host Tx (Serial Transmit) output.
CTS	Clear to Send Input (active low)
SUSP	USB Suspend State (active low)
TXDEN	Transmit Data Enable, for enabling external circuits such as RS485 (active high)
GND	Ground
+5V	+5V Power from USB (up to 500mA). Power supply to external circuits

microUSB (uUSB-PA5-II) additional Pin Outs

Symbol	Description
RTS	Ready to Send Output (active low)
DTR	Data Terminal Ready Output (active low)
RESET	This pin provides a LOW level RESET pulse of several hundred micro seconds when the DTR signal is toggled.
TX	Serial Data Transmit output. This connects to the host Rx (Serial Receive) input.
RX	Serial Data Receive input. This connects to the host Tx (Serial Transmit) output.
CTS	Clear to Send Input (active low)
SUSP	USB Suspend State (active low)
GPIO2	Set to Push/Pull for enabling external circuits such as RS485 (active high)
GND	Ground
+5V	+5V Power from USB (up to 500mA). Power supply to external circuits

5. Typical Applications

The microUSB (**uUSB-PA5/PA5-II**) are designed to accommodate many applications. Its small size and convenient form factor are perfect for adding micro USB functionality to embedded applications.

Obviously the primary purpose of the uUSB-PA5 and uUSB-PA5-II is to be the programming interface for 4D Systems products, however it has a much wider scope and can be utilized for many applications.

The microUSB makes an easy USB-Serial interface, so you can easily create USB to RS-232 converters, USB to RS-422/RS-485 converters, upgrade legacy RS-232 devices, make PDA and cellphone USB interface cables, barcode readers, POS terminals, etc.

In any application, make sure the TX and RX lines from the uUSB are crossed over to the attached peripheral. That is, the TX from the uUSB connects to the RX of the target and the RX from the uUSB connects to the TX of the target device.

Note: the TX and RX signal levels are between 0 Volts and 3.3 Volts, however are 5.0V tolerant.

The microUSB is designed to have a compact footprint, and be compatible with prototyping such as plugging it directly into a breadboard when male 2.54mm (0.1") headers are soldered to the row of 5 pins, along each side.

For assistance with latest driver downloads, please visit the uUSB-PA5 product page of the 4D Systems website, www.4dsystems.com.au
