## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## Basic Switch Common Accessories

## Separator (Sold Separately)

To ensure a secure insulation distance, or if there are other metal parts or copper wire installed too close to the Switch, use the Switch with insulation guard or use a separator purchased separately to keep the insulation distance.

## List of models

| Appearance | Applicable Switches | Thickness (mm) | Model |
| :---: | :---: | :---: | :---: |

Note. The Separator is made of EAVTC (epoxy alkyd/varnish tetron cloth) and has heat-resistant temperature of $+130^{\circ} \mathrm{C}$.

## Dimensions (Unit: mm)

## SEPARATOR FOR V0.18

SEPARATOR FOR V0.25

SEPARATOR FOR SS0. 18
SEPARATOR FOR SS0.4

## Basic Switch Common Accessories

## Actuator (Sold Separately)

Actuators are supplementary components used when operating the Switch using cams or dogs or when transmitting mechanical movements that are not in alignment with the switch plunger. The VAL models are suitable for cases where a Switch is operated by a rotary cam or sliding devices with relatively low operation frequency.
The VAM models are designed to operate in reverse movements and have high shock and vibration resistance. Since the Overtravel (OT) of these models is rather large, they can be used for automatic control or door switches of machining tools.

The VAV models can be used where a small Operating Force (OF) is required.

## These Actuators do not include Switches.

Note. Switches with the mounting holes shown in the diagram can be used except for special models.

## Dimensions (Unit: mm) / Operating Characteristics

* Model numbers are for the Actuators only.

The value given for operating characteristics are reference values. For operating characteristics of models not listed above, consult your OMRON sales representative.

## -Leaf Spring Model

VAL

| Operating characteristics |  |  | In the case of V-15-1A5 |
| :---: | :---: | :---: | :---: |
| Operating Force | OF | Max. | $2.26 \mathrm{~N}\{230 \mathrm{gf}\}$ |
| Releasing Force | RF | Min. | $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$ |
| Overtravel | OT |  | 0.8 mm |
| Movement Differential | MD | Max. | 0.4 mm |
| Free Position | FP | Max. | 17 mm |
| Operating Position | OP |  | $14.9 \pm 0.5 \mathrm{~mm}$ |

$1.96 \mathrm{~N}\{200 \mathrm{gf}\}$ or greater).
-Simulated Leaf Spring

## VAL12

| Operating characteristics |  | In the case of V-15-1A5 |
| :---: | :---: | :---: |
| Operating Force | OF Max. | 2.26 N \{230 gft |
| Releasing Force | RF Min. | $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$ |
| Overtravel | OT Min. | 0.8 mm |
| Movement Differential | MD Max. | 0.4 mm |
| Free Position | FP Max. | 22.9 mm |
| Operating Position | OP | $20.5 \pm 0.8 \mathrm{~mm}$ |

$1.96 \mathrm{~N}\{200 \mathrm{gf}\}$ or greater).

ORoller Leaf Spring

## VAL2

VAL02

| Operating characteristics |  |  | In the case of V-15-1A5 |
| :---: | :---: | :---: | :---: |
| Operating Force | OF | Max. | $2.26 \mathrm{~N}\{230 \mathrm{gf}\}$ |

- Application examples provided in this document are for reference only. In actual applications, confirm equipment functions and safety before using the product.
- Consult your OMRON representative before using the product under conditions which are not described in the manual or applying the product to nuclear control systems, railroad systems, aviation systems, vehicles, combustion systems, medical equipment, amusement machines, safety equipment, and other systems or equipment that may have a serious influence on lives and property if used improperly. Make sure that the ratings and performance characteristics of the product provide a margin of safety for the system or equipment, and be sure to provide the system or equipment with double safety mechanisms.

Note: Do not use this document to operate the Unit.
