

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

PC/104 Extraction Tool

Separates (unplugs) PC/104 and PC/104-Plus modules from each other. Also removes PC/104 and PC/104-Plus modules from expansion sites on Single Board Computers.

Description

VersaLogic's PC/104 extraction tool speeds development and production of PC/104 systems by greatly simplifying the task of separating PC/104 modules. Up to now, detaching the modules from each other was a difficult and time-consuming chore which often resulted in bent connector pins. Unplugging the newer PC/104-Plus modules was especially difficult, due to the hundreds of interconnected pins on both ends of the module. Now PC/104 users can simply place the extraction tool between the boards, squeeze, and the boards easily detach from the stack.

The extraction tool can be used in both development and production environments for separating PC/104 modules from each other, and for separating PC/104 modules from SBC expansion sites. Using the extraction tool is as simple as placing it at the edge of the boards to be separated and squeezing the handle. It features a lifetime warranty and can be safely used with electrostatic sensitive devices.

The extractor is a joint offering of two major PC/104 vendors, VersaLogic Corp. and parvus Corp. It is available in single unit quantities, or at no charge with evaluation orders for any of VersaLogic's PC/104-Plus compatible products.

Instructions

To use the extraction tool with PC/104 modules, turn the tab marked "Single Board Computers" away from the stack. To use the tool with an SBC, position the tab against the bus connector.

Specifications

General	Size	4.5" x 2.5"
Mechanical	Compatibility	PC/104 PC/104-Plus Single Board Computers
