DESCRIPTION

The VLSL12A03… power LED module series combines high lumen output and excellent heat dissipation on an easy to use aluminum metal core PCB. Due to the physical layout of the twelve, serially connected high brightness LEDs, ready-available matrix-lenses with a choice of various emission characteristics could be used just off the shelf. Every module is already equipped with a small thermal sensor and a fourfold plug in connector, so that no additional soldering process is required at customer site.
