## : ©hipsmall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation, and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

N-Channel Enhancement-Mode
Vertical DMOS FET

## Features

- Free from secondary breakdown
- Low power drive requirement
- Ease of paralleling
- Low $\mathrm{C}_{\text {iss }}$ and fast switching speeds
- Excellent thermal stability
- Integral source-drain diode
- High input impedance and high gain

## Applications

- Motor controls
- Converters
- Amplifiers
- Switches
- Power supply circuits
- Drivers (relays, hammers, solenoids, lamps, memories, displays, bipolar transistors, etc.)

## Ordering Information

| Part Number | Package Option | Packing |
| :--- | :--- | :--- |
| $y n n$ | VN2222LL-G | TO-92 |

-G denotes a lead (Pb)-free / RoHS compliant package.
Contact factory for Wafer / Die availablity.
Devices in Wafer / Die form are lead (Pb)-free / RoHS compliant.

## Absolute Maximum Ratings

| Parameter | Value |
| :--- | ---: |
| Drain-to-source voltage | $\mathrm{BV}_{\text {DSS }}$ |
| Drain-to-gate voltage | $\mathrm{BV}_{\text {DGS }}$ |
| Gate-to-source voltage | $\pm 30 \mathrm{~V}$ |
| Operating and storage temperature | $-55^{\circ} \mathrm{C}$ to $+150^{\circ} \mathrm{C}$ |

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

## Typical Thermal Resistance

| Package | $\boldsymbol{\theta}_{\text {ia }}$ |
| :--- | :--- |
| TO-92 | $132^{\circ} \mathrm{C} / \mathrm{W}$ |

## General Description

This enhancement-mode (normally-off) transistor utilizes a vertical DMOS structure and Supertex's well-proven, silicon-gate manufacturing process. This combination produces a device with the power handling capabilities of bipolar transistors and the high input impedance and positive temperature coefficient inherent in MOS devices. Characteristic of all MOS structures, this device is free from thermal runaway and thermally-induced secondary breakdown.

Supertex's vertical DMOS FETs are ideally suited to a wide range of switching and amplifying applications where very low threshold voltage, high breakdown voltage, high input impedance, low input capacitance, and fast switching speeds are desired.

## Product Summary

| $\mathrm{BV}_{\mathrm{DSs}} / \mathrm{BV}_{\mathrm{DGS}}$ | $\mathbf{R}_{\mathrm{DS}(\mathrm{ON})}$ <br> $(\max )$ | $\mathrm{I}_{\mathrm{D}(\mathrm{ON})}$ <br> $(\mathbf{m i n})$ |
| :---: | :---: | :---: |
| 60 V | $7.5 \Omega$ | 750 mA |
