

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

MEMORY & STORAGE SOLUTIONS

DRAM, FLASH/SSD, Persistent Memory & Customized Packaging

viking
TECHNOLOGY

ENGINEERING. DESIGN. MANUFACTURING.

With over 25 years of Memory and Storage experience in supporting some of the world's biggest OEMs, Viking Technology has the capability to support any memory requirements for any market. Whether it's standard off-the-shelf solutions or customized form factors, Viking Technology can support it.

VIKING TECHNOLOGY

Viking Technology is a global technology leader in the fields of RF, Optical, Microelectronics and Memory technologies. With over 25+ years of experience in Engineering, Design, Manufacturing and Test, Viking Technology has led some of the most leading-edge OEM solutions for the embedded/industrial, medical, telecommunications, and military/aerospace markets.

In the field of Memory engineering, Viking Technology specializes in Non-Volatile DIMMs (NVDIMM), Solid State Drives (SSD), and DRAM solutions. With a breadth of products that spans embedded flash solutions such as eUSB, Secure Digital (SD), mSATA, slimSATA, and M.2 SSD to enterprise solutions such as NVDIMM Persistent memory along with 2.5in & 1.8in SATA/PCIe/NVMe/SAS SSDs. Viking Technology also offers one of the most comprehensive lines of DRAM solutions spanning from DDR4 to legacy support of DDR1 in every form factor both standard, ultra small, unique, and custom designs.

Viking Technology's engineering services, design, and expertise also support strategic partner engagements to enable customized solutions not found anywhere else. These solutions span technology engagements in ultra extreme temperatures (-40°C to +200°C), ruggedization, shock & vibe, high-density die stacking, conformal coating, heat dissipation, miniaturization, future storage class memory, and specialize form factor designs.

VIKING TECHNOLOGY FAMILY OF MEMORY SOLUTIONS

PERSISTENT MEMORY

- ▶ DDR4 NVDIMM-N/NVDIMM-P
- ▶ VT-PM family of drives (2.5. in. U.2 NVMe)
- ▶ Energy Subsystems (ESS) – Supercaps
 - ▶ Form Factors: 2.5", PCIe, Custom

FLASH/SSD STORAGE

- ▶ 2.5 in. SSD
- ▶ 1.8 in. SSD
- ▶ M.2 SSD
- ▶ slimSATA
- ▶ mSATA
- ▶ eUSB
- ▶ USB Thumbdrives
- ▶ SD, microSD cards
- ▶ Custom Designs

DRAM (DDR4, DDR3, DDR2, DDR1)

- ▶ Multi-Chip Package (MCP)
- ▶ RDIMM/UDIMM
- ▶ LRDIMM
- ▶ VLP RDIMM/UDIMM
- ▶ ULP RDIMM/UDIMM
- ▶ MINI RDIMM/UDIMM
- ▶ ULP MINI RDIMM/UDIMM
- ▶ SORDIMM/SOUDIMM
- ▶ VLP SORDIMM/SOUDIMM

LEADER IN EMBEDDED SOLUTIONS.

ENTERPRISE STORAGE & SERVERS

- ▶ Storage Arrays
- ▶ Servers
- ▶ Micro Servers
- ▶ Blades
- ▶ HBAs & Custom RAID Cards

TELECOM & NETWORKING

- ▶ Switches
- ▶ Routers
- ▶ Base Stations

INDUSTRIAL/EMBEDDED

- ▶ Embedded Computer
- ▶ ATCA/MicroTCA
- ▶ Ruggedized Computers
- ▶ Gaming, ATM, POS, Industrial Automation
- ▶ In-Flight Entertainment

MILITARY/DEFENSE/AEROSPACE

- ▶ Ruggedized Servers/Laptops
- ▶ UAV
- ▶ Event Recorders
- ▶ Space constrained applications

APPLICATION DRIVEN & OPTIMIZED

- Broadest DRAM Offering
- High demand for reliability
- Efficient storage resource utilization
- Simplify asset management

- High demand for storage performance
- Tier storage based on access requirements

- Long product serviceability
- Small form factor solutions
- Energy efficient solutions
- Zero down-time (fault tolerant)

- Containment of rising infrastructure costs
- Quick online transactions solutions
- Ultra High-Capacity DRAM and Storage

MEMORY & STORAGE SOLUTIONS FOR AUTOMOTIVE APPLICATIONS

In today's Automotive world of "Infotainment" and central computer systems, productivity through receiving real-time data on the go, and advanced driver assistance system (ADAS), the requirements and complexity for embedded storage are critical to the success of driver experience and security. With such demands for high-performance, fast access, extreme temperature and humidity, and shock & vibration resistance, the automotive market have some of the most stringent requirements for storage devices.

Viking Technology's automotive memory & storage solutions are built with automotive requirements in mind. Viking Technology automotive grade memory & storage solutions are tested in climates ranging from mountainous regions to deserts, at temperatures ranging from industrial (-40°C to +85°C) to the standards of today's automotive storage devices (-40°C to +125°C). As ruggedized storage device built to resist larger amounts of shock and vibrations, each solutions are capable of operating at high-speeds conditions while subjected to extreme humidity ranging from 5% to 95% makes it the ideal storage solution for all vehicles (*water submersion capable, ask your Viking representative).

Viking Technology's automotive memory & storage solutions also come with high transactional and transfer performance which are critical to the complexity of today's automobiles due to the increases in workload and performance applications that are necessary to implement on current and future engine technologies (gas, electric and hybrid) as the number of items that are accessed increases. Viking Technology's automotive memory & storage solutions are designed for the growing requirements of in-dashboard infotainment systems, multimedia audio, video and a variety of navigation information for today's vehicles.

AUTOMOTIVE FEATURES

- ▶ Extended Temperature Tested (-40°C to +85°C)
- ▶ Automotive Temperature Graded (-40°C to +125°C)
- ▶ Extreme Humidity Tested (5% to 95%)
- ▶ Fully compliant with RoHS regulation
- ▶ Automotive Shock & Vibration Enabled
- ▶ Solderable solution
- ▶ Beyond Everest Altitude (80,000 ft)
- ▶ PowerFail Protected Supported

MEMORY & STORAGE SOLUTIONS FOR MILITARY APPLICATIONS

APPLICATIONS

- ▶ Rugged Military, Defense Electronics, Homeland Security — Ground, Sea and Air
- ▶ Mobile Hand-Held Field Computers and Mission Data Recorder Instruments
- ▶ Aerospace Avionics and Cockpit Instrumentation
- ▶ Unmanned Ground Vehicles/UAVs/Robotics
- ▶ Guidance Systems/Telemetry/Tracking/GPS
- ▶ Surveillance/Mapping/Reconnaissance

THE VIKING VALUE ADVANTAGE

- ▶ AS9100, TL 9000 and ISO 14001 Certified
- ▶ USA based R&D, Development and Production
- ▶ Advanced Packaging Expertise
- ▶ DOD specified testing capabilities (i.e. TDBI)
- ▶ Long-standing strategic partnerships and comprehensive supply-chain management
- ▶ Obsolescence mitigation
- ▶ Locked BOM under customer PCN control
- ▶ Localized Field Application Engineering for complete pre and post sale technical support

FEATURES

- ▶ Meets SWaP military COTS requirements
- ▶ Password protected AES-128 encrypted data
- ▶ Military Secure Erase and Sanitization
- ▶ Ruggedized and Security enhancements
- ▶ S.M.A.R.T. command transport (SCT) technology
- ▶ Power-throttling support
- ▶ Thermal sensing energy management
- ▶ CRC and ECC
- ▶ Wear-leveling and bad block management
- ▶ S.M.A.R.T. support for SSD vitality monitoring

Designed and manufactured in the USA at an AS9100-certified DOD trusted facility, Viking Technology Memory and Storage are high reliability solutions designed and optimized for Military & Aerospace applications with advanced military security features.

Viking Technology's rugged military designed SSDs combine large flash storage capacities with ultra-reliable performance. These SSDs are rigorously tested and independently verified to MIL-STD-810F to operate in harsh environments:

- ▶ Extreme temperature, Thermal Shock & Cycling
- ▶ Mechanical Shock and Gunfire Vibration
- ▶ Low Pressure – High Altitude
- ▶ High Humidity, Salt Fog, Fungus
- ▶ Blowing Dust and Sand
- ▶ Explosive Atmospheres

MILITARY OPTIMIZED DATA SECURITY

Serving the military market for over 2 decades, Viking Technology storage solutions provides uncompromised data security capabilities and absolute privacy, preventing all unauthorized access to sensitive information through fast military secure erase of password protected AES-128 encrypted data, key and data map. These storage solutions can be further optimized for NSA and DoD purge/sanitization protocols using software commands:

- ▶ NSA/CSS
- ▶ USA Army
- ▶ Air Force
- ▶ DoD5220.22-M
- ▶ Navy NAVSO
- ▶ RCC-TG IRIG

RUGGEDIZATION

Viking Technology solutions can also be enhanced with additional ruggedized and security features to meet stringent requirements for sensitive military applications of government and DOD agencies:

- ▶ Special security options (i.e. Destructive Purge)
- ▶ MIL-STD packaging and labeling
- ▶ Conformal coating qualified
- ▶ Shock/vibration resistant packaging: Silicone gel fill, Epoxy staking, Under-fill or Encapsulation
- ▶ EMP resistance and ESD protection to 30K Volt
- ▶ Shock tolerant connectors
- ▶ Special components (i.e. Hi-Temp, Rad-Hard)

PERSISTENT MEMORY

Viking Technology has a strong legacy in developing Persistent Memory solutions over several generations of products; ranging from Non-Volatile DIMMs (NVDIMMs) to persistent drive form factor solutions with DRAM enablement.

These persistent solutions are delivering the key components to enterprise customers looking to enable the next generation of computing and storage architectures.

DDR4 NVDIMM

Viking's (NVDIMM) **DDR4 Non-Volatile DIMM**, delivers both performance and reliability to enterprise applications. This non-volatile memory module has been designed to be integrated into Intel's new NVDIMM enabled servers via DDR4 DIMM sockets and designed to preserve critical data in the event of a power or system failure. Viking's NVDIMM enables the host system to recover from a failure event with simplicity and ease.

NVDIMM – N

Memory mapped DRAM with no system access to flash.

- ▶ Low-Capacity (2GB - 32GB)
- ▶ Very-low Latency (10s of nanoseconds)

NVDIMM – F

Memory mapped FLASH where DRAM is not system mapped.

- ▶ High-Capacity (100GB - 1TB)
- ▶ Low Latency (10s of microseconds)

NVDIMM – P

Memory mapped FLASH and memory mapped DRAM with two access mechanisms: persistent DRAM (-N) and block oriented drive access (-F).

- ▶ High-Capacity (100GB - 1TB)
- ▶ Low Latency (100s of nanoseconds)

NVDIMM Energy Sub-System (ESS)

The NVDIMM is a DDR4 Non-Volatile DIMM enabled by an energy subsystem (ESS) which provides enough power to the module in an event of power-loss to safely store all mission critical data. Viking's ESS modules come in a variety of standard & custom form factors from 2.5in, PCIe, FanBay and special builds, with or without casing. As well, Viking Technology has the ability to customize any ESS to fit within any customer server/storage appliance.

VT-PM Drive

VT-PM drives, part of Viking's persistent memory technology family of products, are 2.5" U.2 NVMe PCIe Gen3 drives optimized to Enterprise-grade with Radian Memory System's architecture technology. The VT-PM8 and VT-PM16 are persistent memory drives that deliver performance and unlimited write endurance similar to that of DRAM, while simultaneously providing the data persistence desired for enterprise applications.

ADVANTAGES

Simple, Reliable, Persistent	Supports the NVMe Command Set	Hot Swap, Live Insertion, Surprise Remove
No Remote Capacitor Packs or Cabling	Interface Simplicity	OEM Lifecycle Monitoring Diagnostics

- ▶ 2.5" U.2 NVMe Drive form factor
- ▶ Lowest latency NVMe device regardless of queue depth
- ▶ Internal super-capacitor system fully contained in single drive
- ▶ NVMe (block) and byte addressable mmap access
- ▶ Dual Port 2x2 or Single Port x4 mode

SPECIFICATIONS

Capacity	16GB (8GB: VT-PM8)
U.2 2.5" NVMe form factor	Length: 100mm, Height: 15.0mm, Width: 69.75mm
Dual Port and Single Port Modes	Dual Port 2x2 lane configuration or Single Port x4 lane configuration
PCIe x4 Gen3	Compliant with PCI-Sig PCIe 3.0 Base specification
NVMe Command Set	NVM Express specification 1.0
NV-RAM Capacity	8GB, 16GB based upon DDR4 at 2,400 MHz with internal power backup system
DRAM ECC	64-bit data/8-bit ECC code detects double bit errors and corrects single bit errors
NAND ECC	Hardware LDPC engine
NVMe Engines	Supports NVMe command set, submission/completion queues and MSI-X vector interrupts
Programmed I/O (PIO)	Fixed BAR provides support for direct 4 byte addressable (dword) host access by mapping memory (mmap) into host PCI address space with configurable window size
Maximum Payload Size	Configurable to 128B or 256B single packet size
BIST and Health Monitoring	Provides OEMs the ability to monitor environmental status, component health, and log statistics for continuous product life cycle management
Field Upgradeable Firmware Updates	Mechanism for upgrading firmware in the field via host control (no drive removal necessary)
Internal Supercapacitor Module	Field replaceable assembly
Power Requirements (+12V rail)	Typical Maximum: 13.5W at 40°C Recharge Cycle: Up to 17W at 40°C with concurrent r/w operations
Supercapacitor Recharge Time	38 seconds
Temperature	Operating: 0° to 40°C at 100 LFM Storage: 40°C to 85°C
Weight	.295 lbs.
Shock/Vibration	Operating: 5 G Non-Operating: 10 G
ESD	1,500 volts, human body model
MTBF	1M hours
Device Drivers	NVMe Linux 4.10 and above

Utilizes Radian Memory Systems technology

FLASH/ SSD

Viking Technology offers a wide portfolio of Flash & SSD storage solutions that comes in a variety of form factors such as 2.5in, 1.8in, M.2, slimSATA, mSATA, eUSB, USB FlashDrives, SD, microSD and custom build.

As well, Viking Technology utilizes various NAND and Controller vendors to help insulate our customers against single NAND supply issues as well as price competitiveness. This also allows Viking Technology to provide the best form fit and function to each and every application.

2.5 inch SSD

Viking Technology's 2.5 Inch SSDs are built with the understanding of OEM expectations through comprehensive and exhaustive design verification and production test methods. Viking's 2.5 Inch SSDs for the embedded and Industrial market delivers the highest levels of quality, environmental ruggedness and endurance. As well, the 2.5 Inch SSDs can be leverage for the Enterprise market with engineered options for the highest levels of performance and reliability, Viking featuring multiple interfaces including SATA, SAS and PCIe/NVMe that delivers high performance with reliability.

AVAILABLE IN SATA, SAS, PCIE/NVME AND U.2

- ▶ Supports MLC/SLC/3D NAND Configurations
- ▶ Advanced SSD-specific SMART command support
- ▶ Package and firmware customization
- ▶ Locked BOM
- ▶ Data path protection, Encryption, Max Write performance

MARKETS SERVED

Data Center | HDD | Video | Telecom | Aerospace | Servers | Storage

1.8 inch SSD

Viking Technology's 1.8 Inch SSDs are built with the understanding of OEM expectations through comprehensive and exhaustive design verification and production test methods. Viking's 1.8 Inch SSDs for the embedded and Industrial market delivers the highest levels of quality, environmental ruggedness and endurance. As well, the 1.8 Inch SSDs can be leverage for the Enterprise market with engineered options for the highest levels of performance and reliability, Viking featuring SATA-III and delivers high performance with reliability.

COST EFFECTIVE STORAGE SOLUTIONS

- ▶ Available in SATA-III
- ▶ Read intensive & Low cost solution options
- ▶ Data path protection, Encryption, Max write performance
- ▶ Supports MLC/SLC NAND Configurations
- ▶ Advanced SSD-specific SMART command support
- ▶ Package and firmware customization
- ▶ Insulation against single NAND supply issues
- ▶ Locked BOM

MARKETS SERVED

Data Center | HDD | Video | Telecom | Aerospace | Servers | Storage

M.2 SSD

Viking Technology's M.2 Solid State Drive (SSD) is a high-performance, high-capacity flash solution optimized for the embedded and server market. The M.2 SSD is a caseless drive with either a SATA or PCIe/NVMe connector; delivering high-bandwidth READs and WRITEs at a fraction of the size of a standard 2.5 inch SSD. The thin form factor comes in a variety of sizes best fit for the customer's system requirements.

M.2 is a new storage form factor optimized specifically for embedded solutions to increase overall performance and capacity.

VIKING CUSTOMIZATION OPTIONS:

Client and Enterprise options

3D NAND Options

Toshiba 15nm MLC

Micron 16nm MLC

Low capacity form factor 22mm x 42mm

High capacity form factor 22mm x 110mm

Form Factor options 22mm x (42, 60, 80, 110) mm

MARKETS SERVED

Servers | POS | Cache | Industrial | Mobile | Digital Signage | Boot Device

- ▶ Data path protection, Encryption, Max Write performance
- ▶ Ultra high-performance
- ▶ Advanced SSD-Specific SMART command support
- ▶ Low & High capacity form factor options

slimSATA & mSATA SSDs

slimSATA & mSATA SSD are solid state drive solutions ideal for space-constrained embedded server & storage systems, telecommunications, automotive, gaming and many industrial applications. Both solutions deliver outstanding performance in a small, industry standard form factor and features intelligent flash management techniques to optimize endurance and wear-leveling. Both drives come in a variety of performance and capacity as well as ruggedization and increased endurance.

- ▶ Available in SATA-III 6Gbs
- ▶ Read intensive & Low cost solution options
- ▶ Max write performance
- ▶ Supports MLC/SLC/3D NAND Configurations

- ▶ Advanced SSD-specific SMART command support
- ▶ Package and firmware customization
- ▶ Insulation against single NAND supply issues
- ▶ Locked BOM

MARKETS SERVED

Servers | Cache | Data Acceleration | Factory Automation | Boot Device | Medical Equipment

eUSB

The embedded USB (eUSB) module from Viking Technology provides a rugged, reliable and cost effective non-volatile memory solution to OEM customers in the Networking, Embedded and Industrial markets. eUSB modules are secure pluggable USB 2.0/3.0 devices with built-in ECC and global wear-leveling for exceptional reliability and product lifetime. Viking eUSB modules are available in capacities up to 128GB and deliver performance up to 35 MB/s. Available in both industry standard, low profile, and custom versions, as well as 3.3V and 5V operation.

eUSB

- ▶ Reduced size eUSB
- ▶ Optimized for space constraint routers/switches
- ▶ Available in iTemp & cTemp configurations
- ▶ Screw mountable for ruggedization

eUSB eMMC

- ▶ Cost effectiveness utilizing eMMC Flash
- ▶ Low-cost endurance alternative to SLC NAND
- ▶ ECC and Data Management
- ▶ Highest endurance
- ▶ Extremely low cost alternative

USB Thumbdrive

Viking Technology USB Thumbdrive, also known as a USB Flash Drive, is an embedded/industrial Flash storage device that includes flash memory with an integrated USB 2.0/3.0 interface. The USB Thumbdrive comes in a variety of sizes for the best fit for any application and space constraint systems.

- ▶ Optimized for space constraint routers/switches
- ▶ Available in iTemp & cTemp configurations
- ▶ Available in capacities up to 512GB
- ▶ Utilizes SLC/MLC/ 3D NAND
- ▶ Locked BOM
- ▶ Package & Firmware customization
- ▶ Conformal coated configuration

MARKETS SERVED

IP Routing | Switches | Servers | Cache | Data Acceleration | Factory Automation | Medical Equipment | Boot Device | Data Logging

SD & microSD

Viking Technology Secure Digital Cards (SD) and microSD cards are powerful, highest capacity memory cards that deliver maximum speed for performance, reliability, and security to the most demanding of embedded solutions. These removable cards are optimized for the embedded market with high-shock tolerance, high-temperature configurations, and ruggedization for extreme environments.

- ▶ Capacities up to 256GB
- ▶ Superior wear leveling
- ▶ High Performance
- ▶ SD Security specs v. 2.0
- ▶ Mechanical write protection switch
- ▶ Supports commercial and industrial temperature

MARKETS SERVED

Servers | Cache | Data Acceleration | Factory Automation | Medical Equipment | Boot Device | Switches | Data Logging

OVER 25 YEARS OF MEMORY, TEST & MANUFACTURING EXPERTISE.

MEASURES OF QUALITY

- ▶ MTBF calculation using the Belco remodeling method
- ▶ Real-time monitoring of field DPPM
- ▶ Weekly reviews of MRB with closed loop feedback action
- ▶ Weekly monitoring of First pass yield, RTY, scrap, in process defects
- ▶ Bi-annual CSI monitoring of all suppliers
- ▶ Quarterly SSI monitoring of all suppliers
- ▶ Environmental awareness with ISO 14000
- ▶ Corporate CSR
- ▶ Certified to ISO 9000, TL 9000 and AS 9100
- ▶ In-house reliability tools and thermal-cycle, shock chambers
- ▶ Local MIL 810 testing and certification available
- ▶ In-house Failure Analysis
- ▶ All inspectors IPC CERTIFIED
- ▶ All QE's have ASQ certifications
- ▶ In-house designed test programs

ENVIRONMENTAL/RELIABILITY

- Mil-Std-810F Test Suite
- ▶ Altitude
 - ▶ High temp operating
 - ▶ Low temp operating
 - ▶ Humidity
 - ▶ Thermal shock
 - ▶ Blowing dust
 - ▶ Vibration
 - ▶ Mechanical shock
 - ▶ Acceleration
 - ▶ Explosive atmosphere
- EMC
- Thermal Cycling

SSD TEST & VALIDATION SUPPORT

SMART FEATURE SET

- SMART Command Set
 - ▶ Return status
 - ▶ Threshold not exceeded bit
 - ▶ Read attribute data
 - ▶ SMART logging
- SMART Command Transport Functionality
- SMART Attributes
 - ▶ Drive health notification
 - ▶ Performance monitoring
 - ▶ Program/erase cycle count to predict life
 - ▶ Runtime bad blocks

SECURITY FEATURE SET

- ATA Security Feature Set
 - ▶ Test each security mode
 - ▶ Test transactions between modes
 - ▶ Test each mode across power cycles
- ATA Security Erase
 - Instant Erase
 - Military Security Erase
 - 256-bit AES Encryption

LONG TERM ENDURANCE

Long Term Endurance Test

- ▶ Verify bad blocks increasing after extensive number of program/erase cycles
- ▶ Verify spare blocks are being remapped to replace bad blocks
- ▶ Verify data integrity is maintained across all data (user and static)
- ▶ Verify no read/write errors reported to host
- ▶ Monitor SMART attributes for accuracy

Power Cycling During Write Operations

- ▶ Verify firmware and metadata integrity
- ▶ Verify write performance maintained over multiple cycles
- ▶ Verify static data integrity
- ▶ If supercap supported, verify integrity of "in flight" writes
- ▶ Vary timing of power down event relative to when write commands are issued
- ▶ Vary command type, sectors transferred, data pattern each cycle

HARDWARE VERIFICATION PROCEDURE

- Power Consumption, Component Temps
 - ▶ Supply currents measure under varying load and operating modes
 - ▶ Component case temps measured under worst case loads
- AC Timing
 - ▶ Setup time, hold time, output enable access time
 - ▶ All interface modes
 - ▶ NAND timing verified for each NAND configuration supported
 - ▶ Reset to ready

SATA SSD VALIDATION OVERVIEW

SATA/ATA Protocol Validation	SATA Host Interface Validation in all modes: AHCI, Lecacy IDE, BIOS RAID, SAS, etc.	Power Management States and Transitions
Reliability & Error Handling	SMART Feature Set	Security Feature Set
Performance Characterization	Host System Interoperability	Voltage & Temperature Corner Testing
Power Cycling		Long Term Endurance

PERFORMANCE CHARACTERIZATION

- Industry Standard Benchmarks
- ▶ IOmeter
 - ▶ Single SSD and RAID 0 stripe (4-8 SSDs)
 - ▶ Custom flows to pre-condition SSD's for steady state performance
- Custom Performance Characterization Scripts
- ▶ Large matrix of test cases
 - ▶ Command type
 - ▶ Data pattern
 - ▶ Pseudo random
 - ▶ Standard 1's, 0's
 - ▶ Word Increment
 - ▶ Industry standard file formats (zip, mpg, jpg, sql, etc)
 - ▶ # Sectors transferred
 - ▶ Transfer mode
 - ▶ Sequential/random
 - ▶ Logs IOPs and MB/sec for every case

RELIABILITY & ERROR HANDLING

DRAM

Viking Technology has over two decades of experience supporting Original Equipment Manufacturers (OEMs) with the industry's most comprehensive range of DRAM modules. Leveraging advanced packaging expertise, locked BOM control, and AS9100, TL 9000, and ISO 14001 certified facilities, Viking Technology is able to deliver the highest quality DRAM modules that meet the requirements of the Enterprise, Telecommunications and Embedded markets.

Viking Technology also specializes in Stacking Technologies that allow for ultra-high density memory modules. Viking Technology's 3rd Generation of Patented stacking, the VT-Stack™ enables OEM customers that are designing solutions with DRAM, NAND Flash or even next generation memory technologies such as ReRAM, MRAM, or PhaseChange, to optimize the performance and design cycle of their products.

PARALLELCELL (MCP)

Viking Technology ParallelCell Multi-Chip Package (MCP) is part of the extreme density line of DDR3 and DDR4 memory products optimized for the embedded, industrial, and military/aerospace markets. ParallelCell products achieve significantly higher memory performance and density per cubic inch than conventional memory DIMMs. These performance and density milestones will critically change the way future system hardware is designed and deployed.

Very small footprint: Saves up to 85% board space vs. Standard DIMM Modules	Rugged: Soldered-down PBGA – No DIMM connector	Very high memory capacity per cu. in.
Lower cost motherboard due to easier DDR routing	Superior signal integrity	Very high memory bandwidth per cu. in.

Viking Technology's line of memory/storage solutions with extended temperature support are built with the most stringent of requirements in mind, with extreme temperature ranges, high humidity support, shock resistance, and ruggedization. Viking's extended temperature solutions ranges from standard commercial (0°C to +70°C) & industrial temperatures (-40°C to +85°C) as well as customized temperature ranges of up to +170°C. These extended temperature solutions can be found in applications used in mountainous regions to deserts and even in arctic conditions for Oil and Gas down-hole drilling. Beyond the temperature ranges, each solution can be customized as a ruggedized memory/storage device built to resist larger amounts of shock and vibrations. These solutions offer the utmost in performance and reliability in challenging, real-world conditions.

FLASH/SSD EXTENDED TEMPERATURE SUPPORT

From enterprise to Embedded to network infrastructure, OEMs from around the world trust in Viking Technology's DRAM modules and technology. Viking has more than just a long history of supporting OEMs with edging lead DRAM technology but also provides its customers with legacy support. With the industry's broadest offering of standard DRAM modules, specialty modules, and small form factor modules, Viking is not only a provider of high-quality memory but a partner in DRAM technology.

ENGINEERING DESIGN EXPERTISE IN THE FIELD OF RF/MICROWAVE, OPTICAL & MICROELECTRONICS

Viking is the leader in turnkey design and production of complex Optical and RF components and systems used in a variety of applications including the latest communication network infrastructure operating at 100Gb/s and beyond, as well as equipment for medical, industrial and defense/aerospace.

These include components such as lasers, modulators, drivers, sub-systems such as transceivers, amplifiers, microwave radios and complete circuit cards or systems.

TECHNOLOGY

Advanced microelectronic technologies – bare die packaging, wire bonding, flip-chip, optical interconnection

High-speed RF & Optical multi-chip modules (MCM)

High-speed materials & interconnections (advanced ceramics & organic laminates, build-up, flex)

Precision optical alignment & interconnection

PRODUCT DESIGN

Product design for RF, Microwave & Optical applications (analog/digital)

Computer modeling for Optical, RF/EM, Electrical, Thermal, Mechanical

Test systems development (HW/SW)

10/40/100/200G & 400G/1TB – Components, Modules, Blades

Radar T/R modules & Systems

MANUFACTURING

Assembly & test processes for complex RF & Opto-electronic products (Circuit cards, Modules, Components)

Advanced microelectronic & micro-optic processes (chip & wire, flip-chip, active/passive alignment, hermetic sealing)

Flexible manufacturing for early NPI prototypes

Test processes for RF/Optical

Global manufacturing

CORE CAPABILITIES, COMPLETE END-TO-END SOLUTIONS

Comb/Pulse Source

- ▶ Stable & robust pulse source
- ▶ Tuneable center frequency (1530-1620nm)
- ▶ Low Jitter (<1ps)
- ▶ Fiber coupled output

400Gb/s PAM4 QUAD TOSA

- ▶ Low loss optical thin film MUX
- ▶ Flex interconnection at 40GHz
- ▶ <1µm free space optics post cure shift
- ▶ Repeatable flex blind insertion test interface

Tunable Super Channel Source – 400Gb/s Transmission

- ▶ Four Coherent, Phase Locked wavelengths on separate fibers in a single package
- ▶ Output power more than +10dBm per channel
- ▶ High Power SMSR > 35dB
- ▶ Narrow Linewidth <300Khz per line
- ▶ Low power dissipation <2W per channel

X-Band Switch Matrix

- ▶ High performance military radar application
- ▶ Path to path isolation >70dB
- ▶ Wide band operation at X-band
- ▶ Highly integrated RF and control circuits for high speed switching
- ▶ Self diagnostic capability

MICROELECTRONIC TECHNOLOGIES

Bare die interconnections – Optical alignment, wire-bonding, micro flip-chip

Microelectronic components & materials

Microelectronic & optical process engineering & manufacturing

Miniaturization & Optimization of Free-space optical environments

Customize 2.5D & 3D miniaturization

HIGH-SPEED MODELING & DESIGN

Optical modeling & design (components, interconnections) up to 100 GHz

RF, Signal Integrity modeling & design

Power & decoupling networks

Die impedance matching circuits

Free space, guided interconnections

Optical path optimization for Next Gen (PAM4) Systems

RF, OPTICAL COMPONENT DESIGN

RF, Optical, Thermal interconnection design

Substrate/package design

Hermetic, non-hermetic

Package to system interconnection

Components: Drivers, Amplifiers, TRX, Modulators, antennas, lasers, etc.

MODULES/SUB-SYSTEM & BLADE DESIGN

RF, Optical System design – specifications to detailed implementation

Multidisciplinary solutions including optical, analog, high-speed, FPGA, embedded software, physical & thermal design

Modules, blades, systems

RF, OPTICAL TEST ENGINEERING

High-speed, RF, Optical test development for manufacturing & customer specific test environments

Structural, functional, system test

Design validation – high end testing capabilities (110GHz)

RELIABILITY ENGINEERING & REGULATORY TESTING

Reliability analysis, FMEA

Custom product qualification

Failure analysis

Regulatory compliance

VIKING TECHNOLOGY

A DIVISION OF SANMINA CORPORATION

GLOBAL
Customer Connected

WELCOME TO THE SANMINA FAMILY

Sanmina makes some of the most complex and innovative optical, electronic and mechanical products in the world. Recognized as a technology leader, Sanmina provides end-to-end design, manufacturing and logistics solutions, delivering superior quality and support to Original Equipment Manufacturers (OEMs) primarily in the communications networks, computing and storage, medical, defense and aerospace, industrial and semiconductor, multimedia, automotive and clean technology sectors.

Sanmina maintains a network of regional design, quick turn, New Product Introduction (NPI) facilities and repair centers, in addition to a complete global footprint of manufacturing operations in 23 countries on six continents. Each day, in every region of the world, Sanmina designs, manufactures ships and repairs complex, mission-critical products. For over 30 years, customers have come to expect quality, delivery, reliability and service from Sanmina. Together we build productive relationships based on exceptional customer satisfaction.

Viking Technology is proud to be part of the Sanmina family, with a globally recognize name in technology and trusted partner in all of manufacturing.

MATURE Developed Over 25 Years	COMPLETE SYSTEM Consistently Deployed	END-TO-END SERVICES	ADVANCED TECHNOLOGY FOR COMPLEX PRODUCTS
1200+ CUSTOMERS Diverse Customer Base	30,000+ SUPPLIERS Integrated	ENGINEERING AND NPI CAPABILITIES	STRONG LIQUIDITY & FINANCIALS

- ▶ Founded in 1980 in San Jose, California
- ▶ Global footprint: 75 facilities in 25 countries
- ▶ \$6.4B revenue
- ▶ 45,000 employees
