

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

VSC6816SDK and VSC6819SDK

SMBStaX and WebStaX Linux Application Software Package for Managed Enterprise Switches

The SMBStaX (VSC6816SDK) and WebStaX (VSC6819SDK) Linux Application Software Package is a turnkey, fully-managed L2 switch application designed to support all managed enterprise switches. Both SMBStaX and WebStaX include the full source code, compiler, and tools. The applications are customizable to support various port configurations and branding. The software uses the latest Linux operating system for optimal performance and cost-effective implementation.

SMBStaX management is performed through a Web GUI, Command Line Interface (CLI), Simple Network Management Protocol (SNMP), or Java Script Object Notation Remote Procedure Call (JSON-RPC), running on the internal MIPS24Kec CPU. SMBStaX is highly integrated with switch features such as port control, L2 switching, Qos, power management, advanced L3 switching, L3 switching, security, and advanced QoS features.

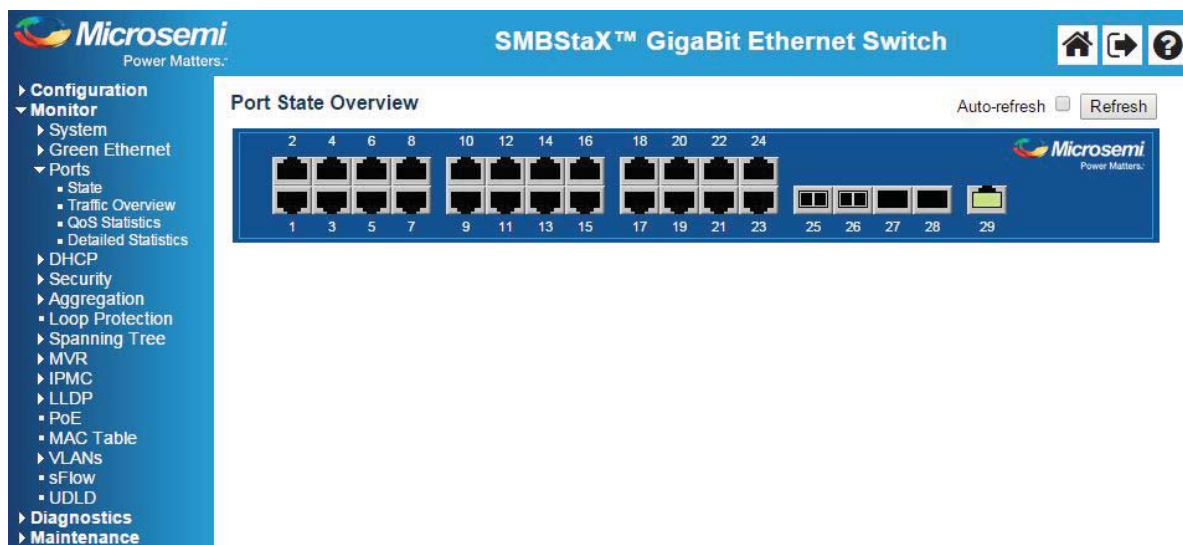

WebStaX management is performed through a Web GUI or Command Line Interface (CLI) running on the internal MIPS24Kec CPU. WebStaX is highly integrated with switch features such as port control, L2 switching, Qos, and power management.

Highlights

- Multiple spanning tree for efficient load sharing and redundancy
- Strong security features for authentication, authorization, and accounting

Applications

- Standalone managed L2 switch for small enterprise networks
- Industrial Ethernet switch for rough environments
- Aviation equipment for passenger entertainment

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees globally. Learn more at www.microsemi.com.
