imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

SERIES: VYB20W-T | DESCRIPTION: DC-DC CONVERTER

FEATURES

- chassis mount with screw terminal connectors
- up to 20 W output
- compact size
- 4:1 input range (9 ~ 36 V, 18 ~ 75 V)
- single and dual outputs
- 1,500 V isolation
- short circuit, over current, and over voltage protection
- wide temperature operation (-40 ~ 85°C)
- efficiency up to 88%

MECHANICAL

APPLICATION NOTES

Requirement on Output Load 1.

In order to ensure the product operates efficiently and reliably, make sure the specified range of input voltage is not exceeded and the minimum output load is not less than 10% load. If the actual load is less than the specified minimum load, the output ripple may increase sharply while its efficiency and reliability will reduce greatly. If the actual output power is very small, please add an appropriate resistor as extra loading.

2. **Recommended Circuit**

The VYB20W series has been tested according to the following recommended testing circuit. This series should be tested under load. (see Figure 1)

If you want to further decrease the input/output ripple, you can increase capacitance properly or choose capacitors with low ESR. If the capacitance is too big, a startup problem might arise. The maximum allowable capacitance to ensure safe and reliable operation is listed in Table 1.

| | Single Vout (Vdc) | Cout (µF) | Cin (µF) | Dual Vout (Vdc) | Cout (µF) | Cin (µF) |
|---------|----------------------|--------------|-------------|--------------------|--------------|-------------|
| | 3.3 | 470 | 100 | - | | |
| Table 1 | 5 | 470 | 100 | ±5 | ±220 | 100 |
| | 12 | 220 | 100 | ±12 | ±100 | 100 |
| | 15 | 220 | 100 | ±15 | ±100 | 100 |
| | 24 | 100 | 100 | | | |

3. Trim Application And Trim Resistance (Single Output Models)

Formula for trim resistance

up:
$$R = \frac{aR_2}{R_2 - a} - R_3$$
 $a = \frac{Vref}{Vo' - Vref} \cdot R_1$
down: $R_T = \frac{aR_1}{R_1 - a} - R_3$ $a = \frac{Vo' - Vref}{Vref} \cdot R_2$

Note: Value for R1, R2, R3, and Vref refer to the following table. R_T: Trim resistance

a: User-defined parameter, no actual meaning.

Vo': Trim up/down voltage.

| Vo Resistance | 3.3 (Vdc) | 5 (Vdc) | 12 (Vdc) | 15 (Vdc) | 24 (Vdc) |
|------------------|-----------|---------|----------|----------|----------|
| R1 (KΩ) | 4.801 | 2.883 | 10.971 | 14.497 | 24.872 |
| R2 (KΩ) | 2.863 | 2.864 | 2.864 | 2.864 | 2.864 |
| R3 (KΩ) | 15 | 10 | 17.8 | 17.8 | 20 |
| Vref (V) | 1.24 | 2.5 | 2.5 | 2.5 | 2.5 |
