

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts,Customers Priority,Honest Operation,and Considerate Service",our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

## CURRENT MODE DIFFERENTIAL BUFFER FOR PCI EXPRESS AND SATA

### 1. GENERAL DESCRIPTION

The W83176R-401 supports eight current mode differential Clock pair's buffer output companion devices to CK409 or CK410 clock generator.

The W83176R-401 provides I<sup>2</sup>C serial bus interface to program the registers to enable or disable each clock outputs. The W83176R-401 accepts a reference clock as its input current mode differential pair's clock.

### 2. PRODUCT FEATURES

- Eight current mode differential clock pairs clock outputs
- Support zero delay buffer mode and normal buffer mode
- Supports every clock pairs hardware output enable/disable pin
- Programmable PLL bandwidth
- Support PLL or NORMAL mode buffer output
- Low Skew outputs (< 50ps)
- Low cycle to cycle jitter (<100ps)
- I<sup>2</sup>C 2-Wire serial interface and supports Byte or Block Data R/W
- 48-pin SSOP package

### 5. PIN DESCRIPTION

BUFFER TYPE SYMBOL	DESCRIPTION
IN	Input
OUT	Output
IN <sub>tp120k</sub>	Latched input at power up, internal 120kΩ pull up.
*	Internal 120kΩ pull-up
#	Low Active

### 5.1 Clock Outputs

PIN	PIN NAME	TYPE	DESCRIPTION
4,5	SRCT_IN SRCC_IN	IN	0.7V SRC Differential clock inputs.
8,9,12,13,16, 17,20,21,30, 29,34,33,38, 37,42,41	DIFT/C (0:7)	OUT	0.7V Differential clock pair outputs.
1	SRC_DIV	IN	For selecting input frequency divided by two, active low
6,14,15,7, 43,35,36,44	OE_(0:7)*	IN	DIFT/C (1:7) output control, 0=Tri-state, 1=Enable output, This is internal 120K pull up.
23	SCLK *	IN	Serial clock of I <sup>2</sup> C 2-wire control interface Internal pull-up resistor 120K to VDD
24	SDATA *	I/O	Serial data of I <sup>2</sup> C 2-wire control interface Internal pull-up resistor 120K to VDD
26	PD#*	IN	Active low to power down the device into low power state is stopped VCO and all output buffers, This is internal 120K pull up.
27	SRC_STOP#*	IN	Active low to stop differential output buffers, This is internal 120K pull up.
28	HIGH_BW#*	IN <sub>tp120k</sub>	Latched input at power up to selecting PLL Band Width 0=HIGH, 1=LOW, This is internal 120K pull up.
46	IREF	IN	Deciding the reference current for the Differential clock pairs. The pin was connected to the precision resistor tied to ground to decide the appropriate current; 475 ohm is the standard value for 0.7V differential clock output.
45	LOCK	OUT	Latched output, transitions high when PLL lock is achieved.
22	PLL/NORMAL#	IN	1= PLL mode, 0=NORMAL buffer mode.

## CURRENT MODE DIFFERENTIAL BUFFER FOR PCI EXPRESS AND SATA

### 7. ACCESS INTERFACE

The W83176R-401 provides I<sup>2</sup>C Serial Bus for microprocessor to read/write internal registers. In the W83176R-401 is provided Block Read/Block Write and Byte-Data Read/Write protocol. The I<sup>2</sup>C write address is defined at 0xDC. The I<sup>2</sup>C read address is defined at 0xDD.

#### 7.1 Block Write protocol

#### 7.2 Block Read protocol

## In block mode, the command code must filled '00h'

#### 7.3 Byte Write protocol

#### 7.4 Byte Read protocol

## In Byte Mode, the index No= (Register No) + 1

# W83176R-401, W83176G-401

## CURRENT MODE DIFFERENTIAL BUFFER FOR PCI EXPRESS AND SATA

### 8. ORDERING INFORMATION

PART NUMBER	PACKAGE TYPE	PRODUCTION FLOW
W83176R-401	48 PIN SSOP	Commercial, 0°C to +70°C
W83176G-401	48 PIN SSOP (Pb-free package)	Commercial, 0°C to +70°C

### 9. HOW TO READ THE TOP MARKING

1st line: Winbond logo and the type number: W83176R-401, W83176G-401(Pb-free part no)

2nd line: Tracking code 2 8051234

2: wafers manufactured in Winbond FAB 2

**8051234**: wafer production series lot number

3rd line: Tracking code 414 G B SA

414: packages made in '2004, week 14

G: assembly house ID; O means OSE, G means GR

B: IC revision

**SA**: For internal use
