(Heavy Duty 10 AWG, Silicone Jacket Test Lead Wire)

Coolflex45

Coolflex45 cables get their name from the extremely low temperature rise under high current conditions. Testing under a continuous AC load of 45 Amps resulted in only a 30°F (17°C) temperature rise. Coolflex45 cables were also exposed to overcurrent loads of 70 Amps for fifteen seconds and resulted in only a 14°F (8°C) temperature rise. (Note, all testing was performed by an independent, certified laboratory)
