

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Two-circuit Limit Switch/Long-life Two-circuit Limit Switch WL-N/WLM-N

Select the Best Two-circuit Switch for the Operating Environment and Application from a Wide Range of Models

- A wide selection of models is available, including general-purpose, environment-resistant, and spatter-prevention switches.
- Standard-feature gold-clad crossbar contacts provide high reliability.
- Applicable to either standard loads or microloads.
- Switches with lever actuators provide 90° overtravel, one-side operation, and four-direction head mounting.
- Approved standards: EN/IEC, UL, cUL, and CCC. Contact your OMRON representative for information on approved models.

! Be sure to read *Safety Precautions* on page 44 to 48 and *Safety Precautions for All Limit Switches*.

Features

Standard Switches

Many Variations in Standard Limit Switches A Wide Range of Models

The series includes many different actuators that you select to match the workpiece shape and motion, and a wide range of Switch variations, such as models with operation indicators for easier working and maintenance and models with different types of connectors.

Environment-resistant Switches

Select from Six Types of Environment Resistance

The series includes airtight switches, hermetic switches, heat-resistant switches, low-temperature switches, corrosion-proof switches, and weather-proof switches. You can select the model based on the onsite environment.

Spatter-prevention Switches

Excellent Performance on Arc Welding Lines or Sites with Spattering Cutting Powder Ideal for Welding Sites

These Switches use stainless steel or resin to prevent the adhesion of spatter. They can be used to reduce problems caused by zinc power generated during welding.

Long-life Switches

Mechanical Endurance of 30 Million Operations Long-life Models for High-frequency Applications

A mechanical durability of 30 million operations minimum is provided. The head features a double-seal structure with a head cap and oil seal.

Features Common to All Switches

DPDB Operation

The double-pole, double-break structure ensures circuit braking.

Degree of Protection; IP67

Approved Standards to Aid Export Machines

The Switches are certified for EN/IEC, UL, cUL, and CCC making them ideal for export machines.

Applicable to Either Standard Loads or Microloads

Standard-feature gold-clad contacts provide high reliability. The use of a high-contact-pressure crossbar structure also increases reliability.

Easy to Work With

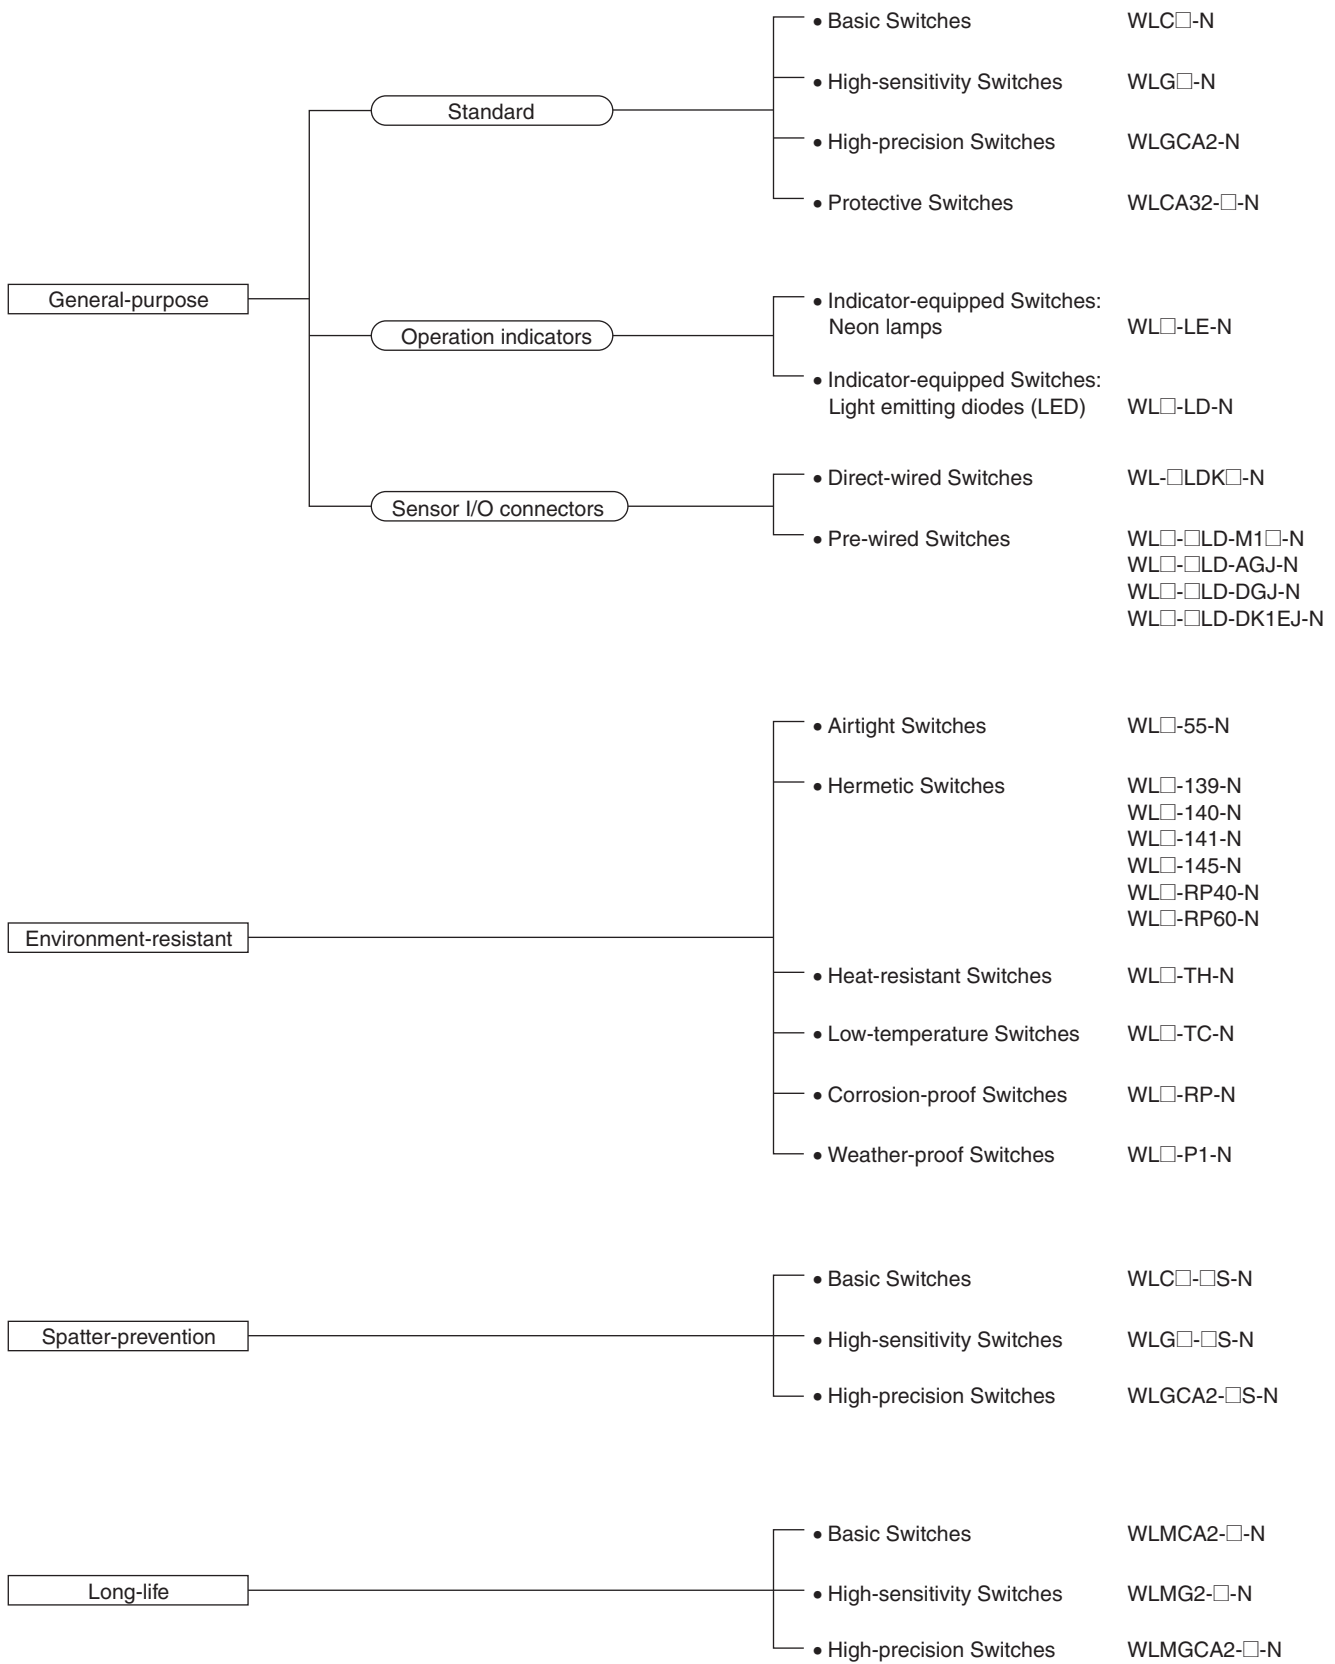

Downsizing of the built-in switch has increased the space to house the wiring. The insulating paper that was often in the way when wiring has been eliminated. Nickel-plated steel screws are used for the terminal screws. The screws adhere to magnetized screwdrivers to prevent dropping and losing them.

Models with Connectors to Reduce Wiring

A neon lamp or LED indicates the operating status. The 3D structure of the lamp cover disperses light so you can check the operating status from the side.

Product Configuration

Environment-resistant Switches

Type	Item	Environment-resistant		
	Model	Application	Environment-resistant construction	Applicable models
Airtight seal	WL□-55-N	For use in locations subject to cutting oil or water.	Uses an airtight built-in switch. Note: Use the SC Connector for the conduit opening.	All models except the low-temperature and heat-resistant models Note: Models can be produced using standard actuators.
	WL□-139-N WL□-140-N WL□-141-N WL□-145-N WL□-RP40-N WL□-RP60-N		Refer to page 29 for information on the environment-resistant construction of Switches with Hermetic Seals.	All models except the low-temperature and heat-resistant models Note: Models can be produced using standard actuators. Only the WLCA2-N, WLGCA2-N, or WLG2-N can be produced for the WL□-141-N and WL□-145-N.
Low-temperature	WL□-TC-N	Can be used at a temperature of -40°C (operating temperature range: -40 to 40°C), but cannot withstand icing.	<ul style="list-style-type: none"> • Uses a general-purpose built-in switch. • Epichlorhydrin rubber is used for rubber parts such as the O-ring, gasket, etc. 	All models except airtight seal, hermetic seal, heat-resistant, corrosion-proof, and indicator-equipped models
Heat-resistant	WL□-TH-N	Can be used in temperatures of 120°C (operating temperature range: 5 to 120°C).	<ul style="list-style-type: none"> • Fluorine rubber is used for rubber parts such as the O-ring, gasket, etc. 	All models except airtight seal, hermetic seal, heat-resistant, corrosion-proof, and indicator-equipped, nylon roller (WLCA2-26N-N), seal roller models, and resin rod (WLNJ-2-N) models
Corrosion-proof	WL□-RP-N	For use in locations subject to corrosive gases and chemicals.	<ul style="list-style-type: none"> • Diecast parts, such as the switch box, are made of corrosion-proof aluminum. • Rubber sealing parts are made of fluorine rubber, which aids in resisting oils and chemicals. • Exposed nuts and screws (except the actuator section) are made of stainless steel. • Moving and rotary parts such as rollers are made of sintered stainless steel or stainless steel. • The head, box, and cover are yellow. 	All models except fork lever lock (WLCA32-41 to -44-N), low-temperature, heat-resistant, and indicator-equipped models
Weather-proof	WL□-P1-N	For use in parking lots and other outdoor locations.	<ul style="list-style-type: none"> • Rubber parts are made from epichlorhydrin rubber, which has a high-tolerance to changes in temperature. • Rollers are made of stainless steel to improve corrosion resistance. • Exposed nuts and screws are made of stainless steel. 	Only basic (WLCA2-N/CA12-N/CL-N), and high-sensitivity overtravel (WLG2-N/G12-N/GL-N) models (excluding heat-resistant models). This does not apply to low-temperature or heat-resistant, or indicator-equipped switches.

Selection Guide

With the WL-N Series, OMRON will combine the switch, actuator, and wiring method required to build the ideal switch for your application.

The WL-N Series consists of four basic types: general-purpose, environment-resistant, spatter-protection, and long-life switches. WLCA2-N Switches can be used for the most common applications.

Note: Leakage current from indicator circuit may cause load malfunction (i.e., the load may remain ON). Make sure that the load operating current is higher than the leakage current. For countermeasures, refer to technical support on your OMRON website.

*1. Light-ON when not operating means the indicator is lit when the actuator is free and is not light when the Switch contacts (NO) close when the actuator rotates or is pushed down.

*2. The position of the positioning piece is not always the same. If using an L-shaped connector causes problems in application, use a straight connector.

- Note:**
- The above figures are initial values.
 - The figures in parentheses for dielectric strength are those for the high-sensitivity switches models.
 - The values are calculated at an operating temperature of +5°C to +35°C and an operating humidity of 40% to 70% RH. Contact your OMRON sales representative for more detailed information on other operating environments.
 - High-sensitivity switches and switches with flexible rod actuators: 10 million operations min. 500,000 operations min. for weather-proof models.
 - Durability is 500,000 operations min. for high-sensitivity models. 500,000 operations min. for weather-proof models. Contact your OMRON representative for information on environment-resistant switches.
 - Switches with Connectors: 1,500 V.
 - Except switches with flexible rod actuators.
 - For low-temperature models this is -40°C to +40°C (with no icing). For heat-resistant models the range is +5°C to +120°C.
