Achieve Total Cost Reduction through High-density Mounting and Reduced Wiring

- IDC connections allow you to wire all terminals at once without terminating the cable.
- Can be DIP-soldered directly to the circuit board.
- Small size (height 5.8 mm, width 6.8 mm) allows more efficient use of circuit board space.
- Uses a 2.54-mm grid terminal arrangement for easier design of circuits.
- Type: standard and reverse.
- Uses UL94 V-0 approved insulation material.
- The IDC Tool has Attachments for all terminals. The result is efficient, labor-saving wiring.

RoHS Compliant

Terminal Arrangement

The contact numbers are not marked on the Connector. If the cables are numbered from 1 starting from the edge, the relationship between the wires and the terminals would be as shown at the right.

Handling

- There is no Strain Relief for the PCB Connector. Leave enough slack to avoid tension on the cable.
- Terminals can be press fit no matter which direction the base and cover are facing.

- See the pages on the XG4 or XG2 connector for information on special tools, such as IDC press tools.
