

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

DIGI XBEE TO IP
GATEWAY WITH CLOUD
MANAGEMENT SERVICES

Programmable gateway connects Digi XBee enabled devices to remote applications over Cellular or Ethernet

The Digi XBee Industrial Gateway is a rugged Digi XBee to IP solution. Ideal for any environment, the gateway has an extended temperature range and rugged enclosure.

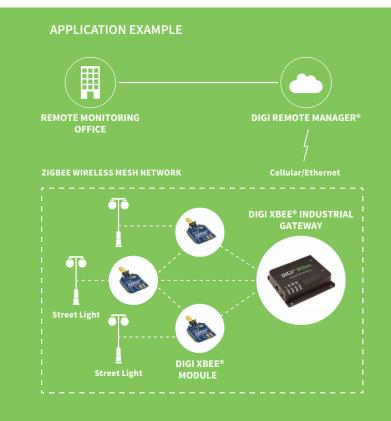

The Digi XBee Industrial Gateway, features scalable remote configuration and management of Digi XBee networks. By default, all Digi XBee data sent to the gateway is automatically available to online applications via Digi Remote Manager®. With a simple, open-source Python development environment, this gateway also enables custom applications to run locally while interfacing across existing Ethernet or Cellular networks for WAN connectivity to cloud-based applications.

Digi XBee Gateway products can be managed remotely via Digi Remote Manager, supporting features like remote firmware upgrades, configuration changes and event alarms. With Digi Remote Manager, users can scale their network from a single device to hundreds of thousands of remote devices.

BENEFITS

- Open-source Python environment for custom application development on the gateway
- Out-of-box integration with Digi Remote Manager® enables remote connectivity, configuration and management of Digi XBee networks
- Zigbee enabled for connection to local wireless devices
- Cellular and Ethernet WAN options for flexible broadband connectivity
- Can be deployed in any environment due to industrial temp range and rugged enclosure
