

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# xCORE-200 USB sliceKIT

## MODULAR DEVELOPMENT SYSTEM KIT

### FEATURES

- Flexible core board
  - 16-core multicore microcontroller with 512KB SRAM (XU216-512-FB236)
  - Up to 2000MIPS compute
  - Three digital I/O slots for sliceCARDs
- High Speed USB Device
- Full Speed USB Host
- Includes USB A/B sliceCARD, and xTAG v3.0 debug adaptor
- Library components and demos to get you started quickly and easily
- Supported by xTIMEcomposer software tools and xCORE libraries

The xCORE-200 USB sliceKIT contains everything you need to start developing USB applications on the powerful xCORE™ multicore microcontrollers from Xmos. The xCORE-200 USB sliceKIT features our 16-core High Speed USB device (XU216-512-FB236) which delivers the deterministic, responsive processing required to handle a variety of peripheral interfaces, data processing and control tasks.

The kit includes a USB slice card with USB A and USB B connectors, which works with xCORE-USB integrated High Speed USB 2.0 PHY. Our sliceKIT product range includes a wide variety of other I/O boards (sliceCARD), making it easy to rapidly develop systems.

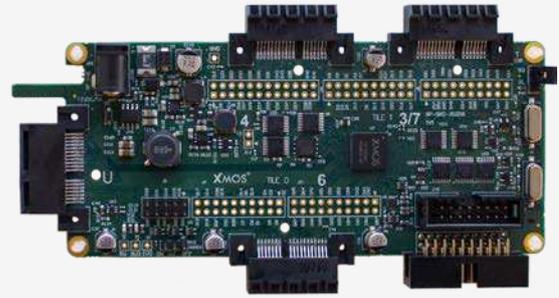

Application development is supported by a range of library peripherals that are seamlessly integrated into your projects using xTIMEcomposer Studio. A range of application notes with full source code show examples of enumerating as different USB Class devices.

Xmos makes developing complex applications simple. sliceKIT gives you the opportunity to rapidly explore the application possibilities, and enables you to realize your designs quickly.

## xCORE-200 USB sliceKIT CONTENTS

### Core Board

The board provides the xCORE-USB multicore microcontroller (XU216-512-FB236) with power, clocking, debug and expansion slots for digital I/O slices.

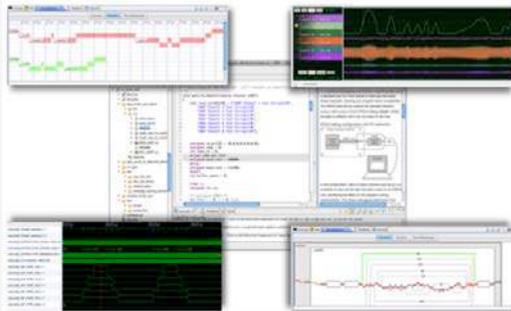

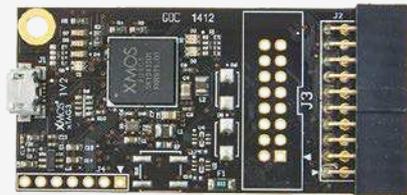

### USB A/B sliceCARD

- USB A and USB B connectors
- Works with xCORE-USB integrated High Speed USB 2.0 PHY

### xTAG Debug Adapter

- Connects to the host via USB 2.0
- Pins for JTAG control, system reset, processor debug, 1 x duplex UART link 1 x duplex serial xCONNECT Link.

### xTIMEcomposer Development Tools

- Eclipse based IDE
  - LLVM Compiler with multicore support
  - GDB based multicore debugger
  - Cycle accurate simulator
  - xSCOPE Software Logic Analyzer
  - Static Timing Analyzer
- Software defined peripheral libraries
