# imall

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Ultra Low Noise

### PLUG & PLAY POWER next generation power solution

## **FEATURES & OPTIONS**

- Low Acoustic noise 37.3dBA
- Ultra high efficiency, up to 89%
- Extra low profile: 1U height (40mm)Plug & Play Power allows fast custom
- Plug & Play Power allows fast custom configuration
- Individual output control signals
- All outputs fully floating
- Series / Parallel of multiple outputs
- Few electrolytic capacitors (all long life)
- Visual LED indicators
- 5V bias standby voltage provided
- Standard Xgen product options include: Conformal Coating, Low Acoustic Noise, Low Leakage Current, Extra Ruggedisation, Connector, Cabling & Mounting options, Thermal Signals and Reverse Fans. See Section 4.10 for more information

## **APPLICATIONS INCLUDE**

- Audio Equipment
- Test and measurement
- Telecommunications
- For Medical applications, See XN

The XT family of Ultra Low Noise power supplies provides up to 400W in an extremely compact 1U x 260mm x 89mm package. With efficiencies of up to 90%, the XT family employs an innovative plug & play architecture that allows users to instantly configure a custom power solution in less than 5 minutes!

Ideal for acoustic sensitive applications such as audio applications, the XT family provides unmatched efficiency and high power density, made possible through the combination of low loss technologies and the best field-proven technologies in planar magnetics and surface mount electronics.

The XT family consists of 2 *powerPac* models ranging in power levels from 200W to 400W. Each model may be populated with up to 4 *powerMods* selected from the table of *powerMods* shown below.

All configurations carry full safety agency approvals, UL60950, EN60950 and are CE marked.

NOTES

1. This product is not intended for use as a stand alone unit and must be installed by qualified personnel.

2. The specifications contained herein are believed to be correct at time of publication and are subject to change without notice.

3. All specifications at nominal input, full load, 25°C unless otherwise stated.

4. When powering inductive or capacitive loads, it is recommended to use a blocking diode on the output.

- 5. Conformal Coating option: See Sections 3.1 and 4.10 for details.
- 6. For section references above go to the Xgen Designers Manual.

# Xgen Flexibility and Signals

For detailed information please refer to the Xgen Designers' Manual which is available on-line or contact Excelsys.

#### Voltage Adjustment

Output voltage can be adjusted in a number of ways:

- 1. On board multi turn potentiometer
- 2. Remote resistive programming (via Vtrim pin)
- 3. Remote voltage programming (via Vtrim pin)

#### **Current Limit Adjustment**

Output current limit can be Straight line or Foldback and can be adjusted via Itrim pin.

#### **Parallel Connection**

To achieve increased current capacity, simply parallel outputs using the standard parallel links.

Parallel Links available to order. Part Number XP1

#### **Series Connection**

To achieve increased output voltages, simply series outputs using standard series links, paying attention to the requirements to maintain SELV levels if required in your system.

Series Links available. Part Number XS1

#### **Remote Sensing**

When the load is remote from the power supply, the remote sense pins may be used to compensate for drops in the power leads. Where the power cabling contributes significant dynamic impedance, see Xgen series Designers' Manual.

#### **Bias Voltage**

A SELV isolated bias (always on) voltage of 5V @ 250mA (30mA on XCE and XVE models) is provided on J2 pin 2 relative to J2 pin 1 (common) and may be used for miscellaneous control functions. 5V @ 500mA available on request.

#### Inhibit/Enable

Inhibiting may be implemented either globally or on a per module basis (*powerPac* or *powerMod* inhibiting). Reverse logic (enabling) may also be implemented.

#### AC Fail

Open collector signal indicating that the input voltage has failed or is less thant 80Vac. This signal changes state giving 5ms of warning beore loss of output regulation.

#### **Power Good**

Opto-isolated output signal indicates that the *powerMod* is operating correctly and output voltage is within normal band.

### powerPac Options

#### **Temperature Alarm (Option 01)**

Open collector signal indicating that excessive temperature has been reached due to fan failure or operation beyond ratings. This signal is activated at least 10ms prior to system shutdown.

#### Fan Fail (Option 01)

Open collector signal indicating that at least one of the *powerPac* fans has failed. This does not cause power supply shutdown. The power supply will continue to operate until 10ms after the temperature alarm signal is generated.

#### **Reverse Fan (Option 02)**

The Xgen series is available with reverse air flow direction. Contact Excelsys for derating details.

#### Ultra Low Leakage current (Option 04)

The Xgen is available with the option of Ultra Low Earth Leakage Current of <150 $\mu$ A and is approved to EN60601-1 and UL60601-1 2nd and 3rd Editions.

#### **Conformal Coating (Option C)**

Xgen is available with conformal coating for harsh environments and MIL-COTs applications.

#### **Ruggedised Option (Option R)**

Xgen is available with extra ruggedisation for applications that are subject to extremes in shock and vibration.

#### Input cable Option (Option D)

3 Wire input mains cable. Input cables are 300mm in length and come supplied with fast on connectors.

#### **Signal Connector Pinout**

# **Xgen Product Selector**

The Xgen series of user configurable power supplies with its unique plug and play architecture allows system designers to define and build 'instant' custom power solutions with industry leading 17W/in<sup>3</sup> power density and up to 90% efficiency.

## Xgen powerPacs

The application specific 4 slot and 6 slot *powerPacs* provide up to 12 isolated DC outputs from 200W up to 1340W. The table below summarises the *powerPacs* by application and power level. Please refer to the specific product datasheets for full specifications.

Application	Slots	200W	400W	600W	700W	750W	800W	900W	1000W	1200W	1340W
Standard	4 Slot	XLA	XLB	XLC		XLD
