**Description**

The Z-330P2J is a small, in-line, ANSI T1.421-compliant customer premise equipment (CPE) filter designed to expedite the service delivery and improve the performance of asymmetric digital subscriber line (ADSL) and home phoneline network (HPN) services over plain old telephone service (POTS). The Z-330P2J filters all telephones, facsimile (fax) machines, answering machines, and other telephone equipment. Its third-order filter design electronically isolates the high-speed ADSL and HPN data streams from the voice-band POTS to provide premium voice quality and optimal DSL and HPN data rates.

**Features**

- Isolates telephone equipment impedances from the ADSL and HPN systems
- Blocks ADSL and HPN signals from voice-band equipment up to 10 Megahertz
- Provides a DSL convenience jack for connecting a DSL modem or HPN device
- Meets ANSI T1.421 (2001) North American DSL filter standard
- ITU-T G.992.1 (Full Rate) and G.992.2 (G.Lite), V.90 and Metallic Loop Testing compatible
- Compliant with UL / CSA 60950, FCC CFR 47 Part 68, and IC CS-03
- CE Mark Certified

*Z-330P2J ADSL over POTS CPE In-Line Filter*

**Applications**

The DSL user installs the Z-330P2J in-line filter into each telephone line jack in the subscribers' premises that contains voice-band equipment devices, including corded/cordless telephones, answering machines, fax machines, 56Kb/s and lower rate modems, automatic dialers, recorder connectors and satellite television set-top boxes.

The Z-330P2J in-line filter is one of many filters and splitters manufactured by Excelsus for subscriber-installed digital services within homes, offices, and hotels. Excelsus is the number one selling brand of DSL filters worldwide.
