

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from,Europe,America and south Asia,supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of “Quality Parts,Customers Priority,Honest Operation,and Considerate Service”,our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip,ALPS,ROHM,Xilinx,Pulse,ON,Everlight and Freescale. Main products comprise IC,Modules,Potentiometer,IC Socket,Relay,Connector.Our parts cover such applications as commercial,industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

Product Overview

PolyZen CE (Consumer Electronics) Series

The PolyZen CE Series is an integrated overvoltage and overcurrent protection device with a slim profile suited for today's thin mobile devices like tablets and ultrabooks.

KEY FEATURES

- Integrated overvoltage and overcurrent protection
- High hold current rating
- Plug and play with +5V and +12V Zener voltage option
- Low 1.0mm height profile
- Single component placement

The new PolyZen CE (Consumer Electronics) series of circuit protection devices for tablet PCs and other portable consumer electronics is a new extension to the family. Consumer electronics require robust circuit protection to help protect sensitive electronics from overvoltage and overcurrent events that can result in costly product returns and warranty issues. The low-profile (1.0 mm-height) PolyZen CE device, rated at an industry-leading 2.6A, is an innovative solution that offers significant performance advantages over discrete solutions employing fuses, Zeners and other passive devices. The PolyZen CE series offers board designers plug-and-play overvoltage protection devices that relieve them of the time it takes to integrate and test less effective discrete and more costly IC solutions.

The PolyZen CE products integrate a precision Zener diode with 5.6V and 13.2V zener voltage (Vz) options and a PolySwitch PPTC (Polymer Positive Temperature Coefficient) device in a single, surface mount assembly. Offered in a compact thin package useful for space constrained applications, the PolyZen CE series uses a thermally protected Zener diode to help shield downstream electronics against voltage transients, reverse-bias and the incorrect use of power supplies. The PolySwitch PPTC element shuts out excessive current while the fault condition remains and helps protect the Zener diode and downstream electronics from damage.

APPLICATIONS

- Tablet PCs and Ultra-books
- Global Positioning and Navigation Systems
- HDDs, SSDs, and Personal Storage
- Cigarette Lighter Adaptor Chargers
- Cell phone charger port and USB power
- Set Top Boxes and Media Players
- Automotive Infotainment power
- DC power port protection
- Industrial handhelds and POS devices

BENEFITS

- High hold current rating up to 2.6A @ 20°C meets Tablet PC requirement
- Low profile for thin form factor consumer electronics
- Fast clamping Zener diode helps to protect downstream electronics
- Integrated plug-and-play device to reduce design and test time
- Single component placement for space constrained applications
- Protects electronics against reverse polarity power sources
- Minimal power dissipation helps to meet total system power budget
- RoHS Compliant and Halogen Free

Electrical characteristics determined at 25°C unless otherwise specified.

(1) I_{HOLD}: Maximum steady state input current that will not generate a trip event.

(2) R_{Typ}: Resistance between V_{IN} and V_{OUT} pins during normal operation at room temperature.

(3) R_{1Max}: The maximum resistance between V_{IN} and V_{OUT} pins.

(4) V_{INT MAX}: V_{INT MAX} is defined as the voltage at which typical devices survived at least 100 trip cycles and 24 hours trip endurance at the specified voltage and current.

(5) I_{FLT MAX}: Maximum RMS fault current the diode can withstand and remain resettable.

(6) The power dissipated by the device when in the “tripped” state.

TYPICAL FAULT RESPONSES

GENERAL CHARACTERISTICS FOR POLYZEN DEVICES

Operating temperature range	-40° to +85°C	
Storage temperature	-40° to +85°C	
ESD withstand	15kV Contact Discharge	IEC61000-4-2, Level 4
Diode capacitance	4200pF	Typical @ 1MHz, 1V _{RMS}
Construction	RoHS compliant and Halogen Free	

DEVICE INFORMATION

Pin Configuration and Block Diagram

Pin Number	Pin Name	Pin Function
1	V _{IN}	V _{IN} = Protected input to Zener diode
2	GND	GND = Ground
3	V _{OUT}	V _{OUT} = Zener regulated voltage output

Mechanical Dimension and Recommended Pad Layout

Recommended Pad Layout

Recommended Solder Stencil (mm)

Solder thickness - 0.15mm

		(mm)		
		Min	Typical	Max
Length	L	4.8	5.0	5.2
Width	W	3.8	4.0	4.2
Height	H	0.8	1.0	1.2
Dimension	A	0.7	0.8	0.9

RECOMMENDED REFLOW PROFILE

Classification Reflow Profiles

Profile Feature	Pb-Free Assembly
Average Ramp-up Rate ($T_{S_{MAX}}$ to T_p)	3°C/second max
Average Ramp-down Rate (T_p to T_L)	6°C/second max
Preheat	
• Temperature Min ($T_{S_{MIN}}$)	150°C
• Temperature Max ($T_{S_{MAX}}$)	200°C
• Time (t_s Preheat)	60-180 seconds
Time maintained above:	
• Temperature (T_L)	217°C
• Time (t_L)	60-150 seconds
Peak / Classification Temperature	
• Temperature (T_p)	260°C
Time within 5°C of actual peak	
• Time (t_p)	20-40 seconds
Time 25°C to peak Temperature	8 minutes max
