

Chipsmall Limited consists of a professional team with an average of over 10 year of expertise in the distribution of electronic components. Based in Hongkong, we have already established firm and mutual-benefit business relationships with customers from, Europe, America and south Asia, supplying obsolete and hard-to-find components to meet their specific needs.

With the principle of "Quality Parts, Customers Priority, Honest Operation, and Considerate Service", our business mainly focus on the distribution of electronic components. Line cards we deal with include Microchip, ALPS, ROHM, Xilinx, Pulse, ON, Everlight and Freescale. Main products comprise IC, Modules, Potentiometer, IC Socket, Relay, Connector. Our parts cover such applications as commercial, industrial, and automotives areas.

We are looking forward to setting up business relationship with you and hope to provide you with the best service and solution. Let us make a better world for our industry!

# Microsemi AcuEdge™ Development Kit for Amazon AVS ZLK38AVS Quickstart Card

#### Kit Contents

Quantity	Description
1	ZLE38AVS board
1	Pillar (plastic stand) and hardware assembly
1	This quickstart card
This kit requires additional hardware (not included)	

Quantity	Description
1	Raspberry Pi 3 with SD Card (≥8GB) and 5V/2A or greater power supply with Micro-USB cable
1	JBL Clip Portable speaker

158/30-2/5 17

#### Overview

Microsemi AcuEdge™ Development Kit for Amazon AVS is engineered to help you evaluate voice-enabled front-end audio systems for your Alexa-enabled products. This kit features Microsemi's ZL38063 voice processor powered by Microsemi's proprietary AcuEdge™ technology for front-end audio clean-up and Sensory's TrulyHandsFree™ "Alexa" wake-word engine. A two microphone configuration allows you to test applications with 180° or 360° audio pick-up.

## Setup Instructions

#### 1. Install the latest Raspbian image on the Raspberry Pi 3

**Notes:** The following installation was tested with Raspbian Jessie (kernel 4.4.50). A VNC connection to the Pi is optional but recommended to limit the number of wires.

#### 2. Assemble the kit

- The 3.5mm jack from the speaker should be plugged into the ZLE38AVS board. Set the speaker to maximum volume.
- The 5V USB power should be plugged to the Raspberry Pi's Micro-USB port. This will back-power the ZLE38AVS board. A 2A power supply is recommended.
- Additional cables may be needed to connect to the Raspberry Pi (Ethernet if not using Wi-Fi, HDMI and peripherals if not using VNC)

#### 3. Create or log in to an Amazon developer account: <a href="http://developer.amazon.com">http://developer.amazon.com</a>

During software installation, you will be requested to enter data from the Amazon developer account, so please make note of the following:

Device ID (labeled Device Type ID below):

Client ID and Client Secret

#### Ensure that the following URLs are correct:

#### Software Installation

Microsemi

- 1. Open a console on the Raspberry Pi.
- 2. Clone the Microsemi ZLK38AVS GitHub repository on the Raspberry Pi: git clone https://github.com/MicrosemiVoiceProcessing/ZLK38AVS
- 3. CD into the above created folder and start the installation process: make all

**Notes:** The installation process will automatically download the requested package and compile them. Depending on your Internet speed, the installation may take from 30 minutes to an hour.

At some points during the installation, you will be asked to enter the Amazon Device ID, Client ID, and Client Secret described in Step 3 of the Setup Instructions and answer additional questions.

4. Once the installation is complete, restart the Raspberry Pi.

## Alexa Service Startup

- 1. Open a console on the Raspberry Pi.
- 2. CD into the ZLK38AVS directory created during software installation and start the Alexa service: make start\_alexa

**Note:** Three terminal windows and an Alexa GUI will start.

- 3. A pop-up window will eventually prompt you to open a web browser in order to log into your Amazon developer account. The web browser might tell you "Your connection is not private", select Advanced and Proceed. Log in, then when the web page displays "device tokens ready", close the web browser and click OK.
- 4. Alexa is now ready, try speaking: "Alexa, what time is it?"
