ZMN2400HPDK/ZMN2400DK ZIGBEE™ DEVELOPER'S KITS

Developer's Kits Contents:

- 2 ea. evaluation boards
- 2 ea. AC power adapters and cords
- 2 ea. patch antennas
- 2 ea. USB cables
- 2 ea. serial cables
- 2 ea. RF cables
- 2 ea. omni antennas
- 2 ea. 9V batteries
- 1 ea. software CD

The ZMN2400HPDK and ZMN2400DK Developer's Kit are comprised of two serial interface boards built around the ZigBee ZMN2400HP or ZMN2400 modules. The kits allow developers to get up and running quickly using either USB or RS-232 interfaces.

The self-contained modems have momentary switches, LEDs, thermister, and potentiometer and can operate on standard 9V alkaline batteries. This provides a simple, effective way to test the range and operation of the radios in the real-time environment. The onboard I/O can be disconnected, allowing user inputs to be connected to the module inputs using connectors.

The ZBDemo program included on the supplied CD allows the reading and writing of end device inputs and outputs as well as network discovery and configuration. If your individual wireless requirements could benefit from the application of ZigBee technology, the ZMN2400DK and ZMN2400HPDK are the premier first step.

Let us be your experts. Cirronet has delivered high-performance wireless products since 1987. To find out how to put our experience to work for you, visit our website www.cirronet.com or call: **+1.678.684.2000**

CIRRONET ZMN2400HP DEVELOPER'S KIT...

- Simple to set-up and configure
- Complete with all components to put a system "on the air"
- Accelerates the integration process
- Full technical support included with purchase
- Allows development of interface to your system
- Allows development of your control software
